

Type of Request: Extension of a currently approved collection.

Abstract: RUS Bulletin 1728H-702 and 7 CFR 1728.202 describe the responsibilities and procedures pertaining to the quality control by producers and pertaining to inspection of timber products produced in accordance with RUS specifications. In order to ensure the security of loan funds, adequate quality control of timber products is vital to loan security on electric power systems where hundreds of thousands of wood poles and cross-arms are used. Since RUS and its borrowers do not have the expertise or manpower to quickly determine imperfections in the wood products or their preservatives treatments, they must obtain service of an inspection agency to insure that the specifications for wood poles and cross-arms are being met. Copies of test reports on various preservatives must accompany each load of poles treated at the same time in a pressure cylinder (charge) as required by 7 CFR 1728.202(i). RUS feels the importance of safety concerns are enough to justify requiring test reports so that the purchaser, inspectors, and RUS will be able to spot check the general accuracy and reliability of the tests.
