

mitigation, and (appropriate to the size of the project) landscape-level conservation and management actions to achieve resource objectives] will be considered.

A critical part of the EIS process is gathering comments and concerns from the public to help the BLM understand the scope of the issues associated with this project. The BLM will utilize and coordinate the NEPA public comment process to comply with section 106 of the National Historic Preservation Act (16 U.S.C. 470f) as provided for in 36 CFR 800.2(d)(3). Native American tribal consultations will be conducted in accordance with BLM policy and sites of religious or cultural significance or other tribal concerns will be given due consideration. Federal, State and local agencies, along with tribes and other stakeholders that may be interested in or affected by the proposed project, may request or be requested by the BLM to participate in the development of the EIS as a cooperating agency. Additional opportunities for public participation will be provided when the Draft EIS is published.

Comments can be submitted in writing to the BLM at any public scoping meeting or through one of the methods listed in the **ADDRESSES** section. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

**SUPPLEMENTARY INFORMATION:** The BLM proposes to amend the 2008 Cottonwood RMP by providing new management direction and allocations for livestock grazing on 19,405 acres of BLM-managed lands within 4 BLM

allotments in Idaho and Adams Counties of Idaho.

In August 2008, the BLM published the Proposed Cottonwood RMP and Final EIS and subsequently received a number of protests on the proposed decision. The BLM Director denied all protest points but one, which was in regard to the adequacy of the range of alternatives for management of domestic sheep grazing on four BLM allotments that are within bighorn sheep habitat. Specifically, the Director found that the Final EIS did not include an adequate range of alternatives to address potential disease transmission from domestic sheep and goats to bighorn sheep, and required that the State Director complete a supplemental EIS that would include a reasonable range of alternatives for managing livestock grazing and would analyze the impacts of domestic sheep and goat grazing within the four allotments. The Director further specified that the supplemental EIS be for the limited purpose of analyzing the impacts of domestic sheep and goat grazing within four allotments.

The Supplemental EIS identifies and analyzes three related planning issues:

(1) Bighorn sheep—Domestic sheep and goats may contact and transmit diseases to bighorn sheep, which may be a contributing factor to the downward trend in bighorn populations.

(2) Native American tribal interests and treaty rights—BLM management of livestock grazing, specifically domestic sheep and goats, may affect the availability of resources and uses (specifically related to bighorn sheep) that are important to the interests and rights of the Nez Perce Tribe.

(3) Livestock grazing and social and economic interests—Changes to BLM management of livestock grazing may affect the local economy.

Please note that public comments and information submitted including names, street addresses, and email addresses of persons who submit comments will be available for public review and disclosure at the above address during regular business hours (8:00 a.m. to 4:00 p.m.), Monday through Friday, except holidays.
