BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

Census Bureau

Proposed Information Collection; Comment Request; Census Employment Inquiry

AGENCY: U.S. Census Bureau, Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: To ensure consideration, written comments must be submitted on or before July 14, 2014.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *jjessup@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Viola Lewis-Willis, Bureau of the Census, 4600 Silver Hill Road, Room 5H043, Washington, DC 20233, (301) 763-3285 (or via the Internet at *viola.l.lewis.willis@census.gov*).

SUPPLEMENTARY INFORMATION:

I. Abstract

The BC-170, Census Employment Inquiry, is used to collect information such as personal data and work experience from job applicants. The BC-170 is used throughout the census and intercensal periods for surveys, special censuses, decennial census pretests, and dress rehearsals. Applicants completing the form for a census related position are applying for temporary jobs in office

and field positions (clerks, enumerators, crew leaders, supervisors). In addition, as an option to the OF-612, Optional Application for Federal Employment, the BC-170A may be used when applying for temporary/permanent office and field positions (clerks, field representatives, supervisors) on a recurring survey in one of the Census Bureau's 6 Regional Offices (ROs) throughout the United States. This form is completed by job applicants at the time they are tested. Selecting officials review the information shown on the form to evaluate an applicant's eligibility for employment. During the decennial census and the associated pre-tests, the BC-170D is intended to expedite hiring and selection in situations requiring large numbers of temporary employees for assignments of a limited duration.

The use of this form is limited to only situations that involve special, one-time or recurring survey operations at one of the ROs and/or which require the establishment of a temporary office. The form has been demonstrated to meet our recruitment needs for field workers and requires significantly less burden than the Office of Personnel Management (OPM) Optional Forms that are available for use by the public when applying for Federal positions. Over the next three years, we expect to recruit approximately 61,500 applicants for census jobs (i.e., one-time censuses, special censuses and decennial pretests and dress rehearsals), which would equate to a significant reduction in the required paperwork and public burden, as compared to other federal application forms.

The bulk of the proposed changes to the form are related to standardizing the information collected across the three variations of the forms which we currently utilized and to collect additional applicant data to facilitate the processing of the application.

II. Method of Collection

We collect this information at the time of testing for temporary and permanent positions. Potential employees being tested complete a four-page to six-page paper application at the time of testing.

III. Data

OMB Control Number: 0607-0139.
Form Number(s): BC-170A, BC-170B, BC-170D.

Type of Review: Regular submission.
Affected Public: Individuals.

Estimated Number of Respondents: 75,000.

Estimated Time per Response: 15 minutes.

Estimated Total Annual Burden Hours: 18,750.

Estimated Total Annual Cost to Public: The only cost to the respondent is his/her time for completing the BC-170A (recurring surveys), BC-170B (special censuses), or BC-170D (decennial censuses).

Respondent's Obligation: Required to obtain a benefit.

Legal Authority: Title 13, U.S.C. Section 23.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: May 8, 2014.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

BILLING CODE 3510-07-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B-1-2014]

Authorization of Production Activity, Foreign-Trade Subzone 181B, Mitsubishi Electric Power Products Inc., (Circuit Breakers), Sebring, Ohio

On December 26, 2013, Mitsubishi Electric Power Products Inc., operator of Subzone 181B, submitted a notification of proposed production activity to the Foreign-Trade Zones (FTZ) Board for its facility in Sebring, Ohio.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (79 FR 3175-3176, 1-17-2014). The FTZ Board has determined that no further review of the activity is warranted at this time. The

production activity described in the notification is authorized, subject to the FTZ Act and the FTZ Board's regulations, including Section 400.14.

Dated: April 28, 2014.

Andrew McGilvray,
Executive Secretary.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B-37-2014]

Foreign-Trade Zone (FTZ) 183—Austin, Texas, Notification of Proposed Production Activity, Samsung Austin Semiconductor, L.L.C., Subzone 183B (Semiconductors), Austin, Texas

Samsung Austin Semiconductor, L.L.C. (Samsung) submitted a notification of proposed production activity to the FTZ Board for its facility in Austin, Texas within Subzone 183B. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on April 28, 2014.

Samsung already has authority to produce semiconductor memory devices for export within Subzone 183B. The current request would add foreign status materials/components to the scope of authority. Pursuant to 15 CFR 400.14(b), additional FTZ authority would be limited to the specific foreign-status materials/components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Export production under FTZ procedures could exempt Samsung from customs duty payments on the foreign status materials/components noted below and in the existing scope of authority. Customs duties also could possibly be deferred or reduced on foreign status production equipment.

The materials/components sourced from abroad include: copper sulfate and hexachlorosilane (duty rate ranges from 1.4 to 3.7%).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is June 23, 2014.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW.,

Washington, DC 20230-0002, and in the "Reading Room" section of the Board's Web site, which is accessible via www.trade.gov/ftz.

FOR FURTHER INFORMATION CONTACT:

Elizabeth Whiteman at Elizabeth.Whiteman@trade.gov or (202) 482-0473.

Dated: May 8, 2014.

Andrew McGilvray,
Executive Secretary.

International Trade Administration

[A-570-933]

Frontseating Service Valves From the People's Republic of China: Final Results of Sunset Review and Revocation of Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On March 3, 2014, the Department of Commerce ("the Department") initiated the sunset review of the antidumping duty order on frontseating service valves from the People's Republic of China ("PRC").¹ Because no domestic interested party filed a notice of intent to participate in response to the *Initiation Notice* by the applicable deadline, the Department is revoking the antidumping duty order on frontseating service valves from the PRC.

DATES: *Effective Date:* April 28, 2014.

FOR FURTHER INFORMATION CONTACT:

Laurel LaCivita at (202) 482-4243, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On April 28, 2009, the Department published the antidumping duty order on frontseating service valves from the PRC in the **Federal Register**.² On March 3, 2014, the Department initiated the sunset review of the antidumping duty Order pursuant to section 751(c) of the Tariff Act of 1930, as amended ("the Act").³ We received no notice of intent

to participate in response to the *Initiation Notice* from domestic interested parties by the applicable deadline.⁴ As a result, the Department concludes that no domestic party intends to participate in this sunset review.⁵ On March 24, 2014, we notified the International Trade Commission, in writing, that we intend to revoke the Order.⁶

Scope of the Order

The merchandise covered by this Order is frontseating service valves, assembled or unassembled, complete or incomplete, and certain parts thereof. Frontseating service valves contain a sealing surface on the front side of the valve stem that allows the indoor unit or outdoor unit to be isolated from the refrigerant stream when the air conditioning or refrigeration unit is being serviced. Frontseating service valves rely on an elastomer seal when the stem cap is removed for servicing and the stem cap metal to metal seat to create this seal to the atmosphere during normal operation.⁷

For purposes of the scope, the term "unassembled" frontseating service valve means a brazed subassembly requiring any one or more of the following processes: the insertion of a valve core pin, the insertion of a valve stem and/or O ring, the application or installation of a stem cap, charge port cap or tube dust cap. The term "complete" frontseating service valve means a product sold ready for installation into an air conditioning or refrigeration unit. The term "incomplete" frontseating service valve means a product that when sold is in multiple pieces, sections, subassemblies or components and is incapable of being installed into an air conditioning or refrigeration unit as a single, unified valve without further assembly.

The major parts or components of frontseating service valves intended to be covered by the scope under the term "certain parts thereof" are any brazed subassembly consisting of any two or more of the following components: a valve body, field connection tube, factory connection tube or valve charge port. The valve body is a rectangular

⁴ See 19 CFR 351.218(d)(1)(i).

⁵ See 19 CFR 351.218(d)(1)(iii)(A).

⁶ See 19 CFR 351.218(d)(1)(iii)(B)(2).

⁷ The frontseating service valve differs from a backseating service valve in that a backseating service valve has two sealing surfaces on the valve stem. This difference typically incorporates a valve stem on a backseating service valve to be machined of steel, where a frontseating service valve has a brass stem. The backseating service valve dual stem seal (on the back side of the stem), creates a metal to metal seal when the valve is in the open position, thus, sealing the stem from the atmosphere.
