Title: RUS Specification for Quality Control and Inspection of Timber Products.

OMB Control Number: 0572-0076.

Type of Request: Revision of a currently approved collection.

Abstract: RUS Bulletin 1728H-702 and 7 CFR 1728.202 describe the responsibilities and procedures pertaining to the quality control by producers and pertaining to inspection of timber products produced in accordance with RUS specifications. In order to ensure the security of loan funds, adequate quality control of timber products is vital to loan security on electric power systems where hundreds of thousands of wood poles and cross-arms are used. Since RUS and its borrowers do not have the expertise or manpower to quickly determine imperfections in the wood products or their preservatives treatments, they must obtain service of an inspection agency to insure that the specifications for wood poles and cross-arms are being met. Copies of test reports on various preservatives must accompany each load of poles treated at the same time in a pressure cylinder (charge) as required by 7 CFR 1728.202(i). RUS feels the importance of safety concerns are enough to justify requiring test reports so that the purchaser, inspectors, and RUS will be able to spot check the general accuracy and reliability of the tests. The Agency has evaluated the current caseload and activity in the area of transmission and distribution and determined that a significant reduction in burden hours is necessary due to the number of alternative materials in use today. RUS also consulted agencies responsible for the majority of RUS borrowers' pole inspection and determined that the inspection time for one million poles, instead of a previously estimated two million, is a more realistic estimate to use in calculating burden hours.

Estimate of Burden: This collection of information is estimated to average 1 hour per response.

Respondents: Not-for-profit institutions; Business or other for profit.

Estimated Number of Respondents: 25.

Estimated Number of Responses per Respondent: 800.

Estimated Total Annual Burden on Respondents: 20,000 hours.

Foreign-Trade Zones Board

[B-40-2014]

Foreign-Trade Zone 38—Spartanburg County, South Carolina; Application for Production Authority; Subzone 38G; Kravet Inc. (Commercial Samples); Anderson, South Carolina

An application has been submitted to the Foreign-Trade Zones (FTZ) Board by the South Carolina State Ports Authority, grantee of FTZ 38, requesting production authority on behalf of Kravet Inc. (Kravet), within Subzone 38G located in Anderson, South Carolina. The application conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.23) was docketed on May 20, 2014.

The Kravet facility (275 employees, 66.5 acres) is located within Subzone 38G. The facility is used for the cutting and tagging of textiles, paper wall coverings and decorative trimmings to be used as samples. Production under FTZ procedures could exempt Kravet from customs duty payments on the foreign components used in export production. The company anticipates that some 12 percent of the plant's shipments will be exported. On its domestic sales, Kravet would be able to choose the duty rates during customs entry procedures that apply to commercial samples of fabric, paper wall coverings and decorative trimmings (duty-free) for the foreign inputs noted below. Customs duties also could possibly be deferred or reduced on foreign status production equipment. The request indicates that the savings from FTZ procedures would help improve the plant's international competitiveness.
