Title of Collection: Progress in International Reading Literacy Study (PIRLS 2016) Field Test and Recruitment for Main Study.

OMB Control Number: 1850-0645.

Type of Review: A reinstatement without change of an existing information collection.

Respondents/Affected Public: Individuals or households.

Total Estimated Number of Annual Responses: 1,919.

Total Estimated Number of Annual Burden Hours: 5,142.

Abstract: The Progress in International Reading Literacy Study (PIRLS) 2016 is coordinated by the International Association for the Evaluation of Educational Achievement (IEA) and in the U.S. administered by the National Center for Education Statistics (NCES). Since its inception in 2001, PIRLS has continued to assess students every five years (2001, 2006, 2011, 2016). It is administered in more than 40 countries and provides data for internationally benchmarking U.S. performance in fourth-grade reading. PIRLS also collects background information on students, teachers, schools, curricula, and official education policies. Each successive participation in PIRLS provides trend information about U.S. 4th-grade students' knowledge and abilities in reading relative to other countries, and about the cultural environments, teaching practices, curriculum goals, and institutional arrangements that are associated with student achievement, and how these change over time in different countries. This submission describes the overarching plan for all phases of the data collection, including the field test and the main study. The field test will take place in March-April, 2015, and the main study will take place in March-April, 2016. The purpose of the PIRLS field test is to evaluate new assessment items and background questions to ensure practices that promote low exclusion rates, and to ensure that classroom and student sampling procedures proposed for the main study are successful. This submission requests approval for recruiting for the 2015 field test and 2016 main study; conducting the 2015 field test data collection; and a description of the overarching plan for all of the phases of the data collection, including the 2016 main study.

Dated: June 26, 2014.
