SUPPLEMENTARY INFORMATION:

Title: Supplemental Nutrition Assistance Program Pre-Screening Tool.
OMB Number: 0584–0519.
Expiration Date: January 31, 2015.
Type of Request: Revision of a currently approved collection.

Abstract: In June 2003, the Food and Nutrition Service (FNS) deployed an interactive web-based pre-screening tool that can be utilized by the general public to determine potential eligibility for benefits in the Supplemental Nutrition Assistance Program (SNAP). The tool has been modified since the last revision of this collection to maintain ease of use. Once the user enters household size, income, expenses and resource information, the tool will calculate and provide the user with an estimated range of benefits that the household may be eligible to receive. Since SNAP eligibility and benefit amount may vary by location, FNS makes it clear that the tool is only an estimator and the household will need to contact the local agency to determine actual eligibility and the appropriate benefit amount. Other data collected are:

- State: State or territory in which the user resides;

- Number of People: Number of people living in the household;
- Migrant Workers: Is anyone in the household a seasonal or migrant farm worker;
- Homeless: Is the household homeless or living in a shelter;
- Citizenship: Whether each member is a U.S. citizen;
- Utility expenses: Whether client is billed for utility costs;

Although the tool also requests the name and age of the user, FNS does not retain this information nor does it request other personally identifiable information such as social security numbers, birthdays, etc. of the household members. FNS estimates it will take approximately 402, 534 users about 10 minutes (0.167 hours) to provide the required information to receive potential eligibility benefit information using the pre-screening tool. Users are expected to access the system once for a total annual response of 402,534. FNS estimates 67,223 burden hours for this activity. Once the user logs out of the system, none of the user-provided information is retained by FNS.

In reviewing National Databank program participation data for FY 2012

to FY 2014, it was noted that a peak in household participation occurred in FY 2013. Although we estimated a 1.65 percent difference in participation levels since the last extension of this collection, the trajectory of current participation levels suggests that household participation in SNAP may level off for FY 2014. Based on this analysis, and the number of potential applicants estimated to use the prescreening tool, the current burden inventory is 66,132; FNS projects an annual burden of 67,223 hours, representing an increase of 1,091 hours.

Affected Public: Individuals and Households, potential SNAP clients.

Estimated Number of Respondents: 402,534.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Responses: 402,534.

Estimate Time per Response: 0.167.

Estimated Total Annual Burden: 67,223.

Because none of the data entered by users is retained, there is no recordkeeping requirement associated with this information collection.
