PURPOSE(S):

This system is used by the Army National Guard (ARNG) and U.S. Army Reserves (USAR) Surgeons to support recruiting and medical readiness of personnel in the Reserve Components. The primary functions of this system are to aid in the continuity of care of Guardsmen and Reservists and to assist in determining the medical and psychological suitability of persons for service or assignment. This distinct record set is necessary due to the unique nature of the ARNG and USAR which typically do not receive their routine medical care at an Active Component military medical treatment facility (MTF); therefore, Military Treatment Records (MTRs) are not retained at an MTF. This distinct record set is also necessary for recruiting since the ARNG does not maintain records on medical waiver evaluations.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act of 1974, as amended, these records contained therein may specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

Information may be disclosed to the Department of Veterans Affairs to adjudicate veterans' claims and provide medical care to Army members.

To the National Research Council, National Academy of Sciences, National Institutes of Health, Armed Forces Institute of Pathology, and similar institutions for authorized health research in the interest of the Federal Government and the public. When not essential for longitudinal studies, patient identification data shall be eliminated from records used for research studies. Facilities/activities releasing such records shall maintain a list of all such research organizations and an accounting disclosure of records released thereto.

To local and state government agencies for compliance with local laws and regulations governing control of communicable diseases, preventive medicine and safety, child abuse, and other public health and welfare programs.

To third party payers per 10 U.S.C. 1095 as amended by Public Law 99-272, Health care services incurred on behalf of covered beneficiaries: collection from third-party payers, for the purpose of collecting reasonable inpatient/outpatient hospital care costs incurred on behalf of retirees or dependents.

To former DoD health care providers, who have been identified as being the subjects of potential reports to the National Practitioner Data Bank as a result of a payment having been made on their behalf by the U.S. Government in response to a malpractice claim or litigation, for purposes of providing the provider an opportunity, consistent with current requirements and Army Regulation 40-68, Clinical Quality Management, to provide any pertinent information and to comment on expert opinions, relating to the claim for which payment has been made.

The DoD Blanket Routine Uses set forth at the beginning of the Army's systems of records notices may apply to this system.

Note: Records of identity, diagnosis, prognosis, or treatment of any client/patient, irrespective of whether or when he/she ceases to be a client/patient, maintained in connection with the performance of any alcohol or drug abuse prevention and treatment function conducted, regulated, or directly or indirectly assisted by any department or agency of the United States, shall, except as provided therein, be confidential and be disclosed only for the purposes and under the circumstances expressly authorized in 42 U.S.C. 290dd-2. This statute takes precedence over the Privacy Act of 1974 in regard to accessibility of such records except to the individual to whom the record pertains. The DoD Blanket Routine Uses do not apply to these types of records.

Note: This system of records contains individually identifiable health information. The DoD Health Information Privacy Regulation (DoD 6025.18-R) issued pursuant to the Health Insurance Portability and Accountability Act of 1996, applies to most such health information. DoD 6025.18-R may place additional procedural requirements on the uses and disclosures of such information beyond those found in the Privacy Act of 1974, as amended, or mentioned in this system of records notice.

DEPARTMENT OF ENERGY

[FE Docket No. 14-96-LNG]

Alaska LNG Project LLC; Application for Long-Term Authorization To Export Liquefied Natural Gas Produced From Domestic Natural Gas Resources to Non-Free Trade Agreement Countries for a 30-Year Period

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of application.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt of an application (Application) filed on July 18, 2014, by Alaska LNG Project LLC (Alaska LNG), requesting long-term multi-contract authorization to export 20 million metric tons per annum (mtpa) of liquefied natural gas (LNG) produced from Alaskan sources in a volume equivalent to approximately 929 billion cubic feet per year (Bcf/yr) of natural gas, or approximately 2.55 Bcf per day (Bcf/d).¹ Alaska LNG seeks authorization to export the LNG by vessel from a proposed Liquefaction Facility to be constructed in the Nikiski area of the Kenai Peninsula in south central Alaska (Project), to any country with which the United States does not have a free trade agreement (FTA) requiring national treatment for trade in natural gas and with which trade is not prohibited by U.S. law or policy (non-FTA countries).² Alaska LNG requests this authorization for a 30-year term to commence on the earlier of the date of first export or 12 years from the date the requested authorization is granted. Alaska LNG seeks to export the LNG on its own behalf and as agent for other parties who hold title to the LNG at the time of export. The Application was filed under section 3 of the Natural Gas Act (NGA).

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures, and

¹ Alaska LNG states that the conversion factor of 46.467 Bcf per million metric ton is appropriate due to the relatively high heating content (Btu/cubic foot gas) and associated physical characteristics of LNG produced from Alaska sources. According to Alaska LNG, the conversion factors used in applications to export LNG from the lower 48 states of the United States are not applicable in this proceeding.

² In the Application, Alaska LNG also requests authorization to export LNG to any nation that currently has, or in the future may enter into, a FTA requiring national treatment for trade in natural gas (FTA countries). DOE/FE will review Alaska LNG's request for a FTA export authorization separately pursuant to NGA § 3(c), 15 U.S.C. 717b(c). Alaska LNG notes that the total volume requested in the Application (20 mtpa) represents LNG in an aggregate amount for export to both non-FTA and FTA countries.
