Notice of Intent To Prepare a Supplemental Environmental Impact Statement and Possible Land Use Plan Amendments for Segments 8 and 9 of the Gateway West 500-kV Transmission Line Project in Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management (BLM) Idaho State Office announces its intention to prepare a supplemental environmental impact statement (EIS) analyzing the potential impacts of approving a right-of-way (ROW) application for Segments 8 and 9 of the Gateway West 500-kilovolt (kV) Transmission Line Project and possible land use plan amendments. The supplemental EIS will be prepared in accordance with the National Environmental Policy Act of 1969, as amended (NEPA). The supplemental EIS is being prepared based on new information described in the **SUPPLEMENTARY INFORMATION** section of this notice. The BLM issued a Record of Decision (ROD) for the project on November 14, 2013. In that ROD, the BLM deferred offering a ROW grant for two of the 10 segments—Segments 8 and 9—to allow additional time for Federal, State, and local permitting agencies to examine additional options regarding siting route segments and mitigation and enhancement measures for those segments.

DATES: This notice initiates a 30-day public scoping period that will assist in the preparation of a draft supplemental EIS. Comments may be submitted in

writing until October 20, 2014, or 15 days after the date of the last public scoping meeting, whichever is later.

To provide the public an opportunity to review the proposal and project information, the BLM expects to hold four public meetings in Idaho communities during the scoping period. The BLM will announce the exact dates, times, and locations for these meetings at least 15 days prior to each event. Announcements will be made by news release to the media, newsletter mailings, and posting on the project Web site listed below.

ADDRESSES: You may submit comments or resource information related to the project by any of the following methods:

PacifiCorp, dba Rocky Mountain Power, and Idaho Power (Applicants) have submitted a ROW application to locate 500-kilovolt (kV) electric transmission lines on Federal lands as part of the Gateway West Transmission Line Project. The initial application proposed to construct electric transmission lines from the Windstar Substation near the Dave Johnston Power Plant at Glenrock, Wyoming, to

the Hemingway Substation near Melba, Idaho, approximately 20 miles southwest of Boise, Idaho. The original project comprised 10 transmission line segments with a total length of approximately 1,000 miles. The November 2013 ROD authorized routes on Federal lands for Segments 1 through 7 and Segment 10 but deferred a decision for Segments 8 and 9. The Applicants submitted a revised project application for Segments 8 and 9. This notice announces that the BLM, Idaho State Office, intends to prepare a supplemental EIS for Segments 8 and 9 of the Gateway West Transmission Line Project and begins the scoping process to seek public input on new issues and resource information related to Segments 8 and 9, described below. Analysis in the supplemental EIS will support a decision on whether to approve, approve with modifications, or deny the revised ROW application for Segments 8 and 9.

In November 2013, the BLM requested the Boise District Resource Advisory Council (RAC) to consider issues surrounding siting Segments 8 and 9 of the Gateway West Transmission Line Project. As proposed, these segments would traverse portions of the BLM Boise District in and around the Morley Nelson Snake River Birds of Prey National Conservation Area (NCA), as well as on private lands. The RAC, a citizen-based council chartered under Section 309 of the Federal Land Policy and Management Act (FLPMA) and the Federal Advisory Committee Act, advises and makes recommendations to the BLM on resource and public land management issues in southwestern Idaho. The RAC formed a subcommittee to examine options for resolving remaining issues associated with siting Segments 8 and 9. On June 5, 2014, the RAC provided the BLM with the report on alternative route options and resource considerations for Segments 8 and 9. On August 8, 2014, the Applicants formally adopted routes recommended by a majority of the subcommittee as their proposed routes for the supplemental EIS in a revised project application that modifies the Applicants' original proposal. These updated proposed routes, a double-circuit design feature (see below), and additional mitigation measures are major components of the new information now available for public scoping.

The Applicants' proposed route for each of the two segments has been modified from the 2013 BLM Preferred Route west of approximate midway points, identified as "nodes" in reports submitted by the RAC. Maps that
