Nature of Decision To Be Made

The decisions to be made include: Whether to implement the proposed action or an alternative to the proposed action, what monitoring requirements would be appropriate to evaluate the implementation of this project, and whether a forest plan amendment would be necessary as a result of the decision for this project.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. In November 2014, a scoping notice (flyer) will be mailed to interested and affected parties directing them to the project's information which will be posted to the Helena National Forest's Web page (<http://www.fs.usda.gov/helena/>). The Web page will contain detailed project information, identification of when public meetings will be scheduled, project proposal maps, and other pertinent project information.

It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions. The submission of timely and specific comments can affect a reviewer's ability to participate in the administrative objection process or any judicial review.

Dated: October 23, 2014.

William Avey,
Forest Supervisor.

Low Enriched Uranium from France: Final Results of Changed Circumstances Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (the Department) determines that changed circumstances exist which affected the ability of Global Nuclear Fuel—Americas, LLC (GNF-A) to manage its inventory and comply with the 18-month re-export requirement provided for in the exclusion from the scope of the order. Specifically, the Department finds that certain past entries by GNF-A of low enriched uranium (LEU) from France satisfy the conditions for exclusion from the order, and that GNF-A will be allowed to make certain future entries of LEU under the provision for exclusion from the scope of the order.

DATES: *Effective Date:* October 29, 2014.

FOR FURTHER INFORMATION CONTACT:

Andrew Huston, AD/CVD Operations, Office VII, Enforcement and

Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202) 482-4261.

SUPPLEMENTARY INFORMATION:

Background

On October 2, 2014, the Department published the Preliminary Results of Changed Circumstances Review of Low Enriched Uranium from France.¹ No parties commented on these preliminary results.

Scope of the Order

The product covered by the order is all low-enriched uranium. Low-enriched uranium is enriched uranium hexafluoride (UF₆) with a U²³⁵ product assay of less than 20 percent that has not been converted into another chemical form, such as UO₂, or fabricated into nuclear fuel assemblies, regardless of the means by which the LEU is produced (including low-enriched uranium produced through the down-blending of highly enriched uranium).

Certain merchandise is outside the scope of the order. Specifically, the order does not cover enriched uranium hexafluoride with a U²³⁵ assay of 20 percent or greater, also known as highly-enriched uranium. In addition, fabricated low-enriched uranium is not covered by the scope of the order. For purposes of the order, fabricated uranium is defined as enriched uranium dioxide (UO₂), whether or not contained in nuclear fuel rods or assemblies. Natural uranium concentrates (U₃O₈) with a U²³⁵ concentration of no greater than 0.711 percent and natural uranium concentrates converted into uranium hexafluoride with a U²³⁵ concentration of no greater than 0.711 percent are not covered by the scope of the order.

Also excluded from the order is low-enriched uranium owned by a foreign utility end-user and imported into the United States by or for such end-user solely for purposes of conversion by a U.S. fabricator into uranium dioxide (UO₂) and/or fabrication into fuel assemblies so long as the uranium dioxide and/or fuel assemblies deemed to incorporate such imported low-enriched uranium (i) remain in the possession and control of the U.S. fabricator, the foreign end-user, or their designed transporter(s) while in U.S. customs territory, and (ii) are re-exported within eighteen (18) months of entry of the low-enriched uranium for

consumption by the end-user in a nuclear reactor outside the United States. Such entries must be accompanied by the certifications of the importer and end user.

The merchandise subject to this order is classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheading 2844.20.0020. Subject merchandise may also enter under 2844.20.0030, 2844.20.0050, and 2844.40.00. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise subject to this proceeding is dispositive.

Final Results of Changed Circumstances Review

Because there were no comments on the preliminary results, the Department adopts the reasoning and findings of fact in the preliminary results as the final results of the review. The Department's full analysis of the details of GNF-A's request for CCR and the information provided by GNF-A in its questionnaire response requires a discussion of business proprietary information, which can be found in the proprietary Memorandum to Paul Piquado, Assistant Secretary for Enforcement and Compliance, "Preliminary Results of Changed Circumstances Review: Analysis of GNF-A Business Proprietary Information."² The Department finds that certain past entries by GNF-A of LEU from France satisfy the conditions for exclusion from the order, and that GNF-A will be allowed to make certain future entries of LEU under the provision for exclusion from the scope of the order.

Instructions to CBP

The Department will issue revised certifications and instructions to U.S. Customs and Border Protection regarding GNF-A's compliance with the 18-month re-export requirement.

A public version of this memorandum is also available on IA ACCESS, and it is available to all parties in the Central Records Unit of the main Commerce Building, room 7046.
