

and additional monitoring; notifying each worker of their exposure monitoring results either in writing or by posting; implementing a written compliance program; and establishing a respiratory protection program in accord with OSHA's Respiratory Protection Standard (29 CFR 1910.134).

## II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

## III. Proposed Actions

OSHA is requesting to increase its current burden hours from 20,558 to 22,381 hours, a total increase of 1,823 hours. Although the cost of exposure monitoring sampling increased slightly from \$19 to \$20, there was a \$14,976 increase in the overall cost of sampling (from \$79,344 to \$94,320). Further, although the cost of a medical exam increased from \$175 to \$187, there was a \$976,550 increase in the overall cost of medical exams (from \$2,369,850 to \$2,848,384), as a result of the increase in the number of medical exams.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The information collection requirements specified in the Acrylonitrile (AN) Standard protect

workers from the adverse health effects that may result from their exposure to AN. The major information collection requirements of the AN Standard include notifying workers of their AN exposures, implementing a written compliance program, providing examining physicians with specific information, ensuring that workers receive a copy of their medical examination results, maintaining workers exposure monitoring and medical records for specific periods, and providing access to these records by OSHA, the National Institute for Occupational Safety and Health, the affected workers, and designated representatives.

##### II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

##### III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Acrylonitrile Standard (29 CFR 1910.1045).

OSHA is requesting an adjustment decrease in the burden hour total from 2,299 to 1,999 hours, a total decrease of 300 hours as a result of the decreased number of affected establishments based on updated data. There was a slight adjustment of the number of exposure monitoring samples from 864 to 814., but the number of medical exams slightly decreased from 630 to 594, which resulted in a slight cost decrease. The adjustment of the burden hours and costs are shown in detail by provision in the supporting statement.

**Type of Review:** Extension of a currently approved collection.

**Title:** Acrylonitrile Standard (29 CFR part 1910.1045).

**OMB Control Number:** 1218-0126.

**Affected Public:** Business or other for-profits.

**Number of Respondents:** 16.

**Frequency of Responses:** On occasion.

**Total Responses:** 4,516.

**Average Time per Response:** Varies from five minutes (.08 hour) to obtain a physician's certificate to 12 hours to develop a compliance program.

**Estimated Total Burden Hours:** 1,999.

**Estimated Cost (Operation and Maintenance):** \$144,628.

*Manila rope and manila-rope slings (paragraph 1915.112(a)(1))*—The employer must ensure that manila rope and manila-rope slings have permanently affixed and legible identification markings as prescribed by the manufacturer that indicate the recommended safe working load for the type(s) of hitch(es) used, the angle upon which it is based, and the number of legs if more than one.

*Wire rope and wire-rope slings (paragraph 1915.112(b)(1)(i))*—The employer must ensure that wire rope and wire-rope slings have permanently affixed and legible identification markings as prescribed by the manufacturer that indicate the recommended safe working load for the type(s) of hitch(es) used, the angle upon which it is based, and the number of legs if more than one.

*Chain and chain slings (paragraph 1915.112(c)(1)(i))*—The employer must ensure that chain and chain slings have permanently affixed and legible identification markings as prescribed by the manufacturer that indicate the recommended safe working load for the type(s) of hitch(es) used, the angle upon which it is based, and the number of legs if more than one.

*Chain and chain slings (paragraph 1915.112(c)(2))*—The employer shall visually inspect all sling chains, including end fastenings, before being used on the job, as well as every three months. The inspection shall include inspection for wear, defective welds, deformation and increase in length or stretch. Each chain shall bear an indication of the month in which it was thoroughly inspected.

*Shackles (paragraph 1915.113(a)(1))*—The employer must ensure that shackles have permanently
