SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3005, of the intent to repatriate cultural items under the control of the San Francisco State University NAGPRA Program that meet the definition of unassociated funerary objects under 25 U.S.C. 3001.

This notice is published as part of the National Park Service's administrative

responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American cultural items. The National Park Service is not responsible for the determinations in this notice.

History and Description of the Cultural Items

Based on the request for repatriation submitted by the Tuolumne Band of Me-Wuk Indians of the Tuolumne Rancheria of California, each of the objects below meets the definition of unassociated funerary objects under 25 U.S.C. 3001 and 43 CFR 10.2(d)(2)(ii), (d)(3), or (d)(4). Through the summary, consultation, and notification procedures in 43 CFR 10.14, the cultural affiliation of the cultural items below with the Tuolumne Band of Me-Wuk Indians of the Tuolumne Rancheria of California was established.

Between 1970 and 1971, 2 cultural items were removed from site CA-TUO-314, located on the southern bank of Moccasin Creek, near LaGrange, in Tuolumne County, CA, during archeological excavations conducted by San Francisco State University. The 2 unassociated funerary objects are ground stone artifacts associated with human remains from Burial 5; the human remains are not present at San Francisco State University. The geographic location of the sites and archeological, historical, and oral history evidence indicate that these unassociated funerary objects are Native American. The objects are consistent with the material culture of the ancestral Sierra Miwok who occupied this area during the Euro-American contact period, and Ca-TUO-314 is located in an area that is documented as Central Sierra Miwok territory. Oral history evidence presented during consultation indicates that the area has been continuously occupied by the Miwok since the contact period and that there is cultural affiliation between the Tuolumne Band of Me-Wuk Indians of the Tuolumne Rancheria of California.

Determinations Made by the San Francisco State University NAGPRA Program

Officials of the San Francisco State University NAGPRA Program have determined that:

- Pursuant to 25 U.S.C. 3001(3)(B), the 2 unassociated funerary objects described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are believed, by a

preponderance of the evidence, to have been removed from a specific burial site of a Native American individual.

- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the unassociated funerary objects and the Tuolumne Band of Me-Wuk Indians of the Tuolumne Rancheria of California.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian tribe or Native Hawaiian organization not identified in this notice that wish to claim these cultural items should submit a written request with information in support of the claim to Jeffrey Boland Fentress, San Francisco State University NAGPRA Program, c/o Department of Anthropology, San Francisco State University, 1600 Holloway Avenue, San Francisco, CA 94132, telephone (415) 338-3075, email fentress@sfsu.edu, by December 17, 2014. After that date, if no additional claimants have come forward, transfer of control of the unassociated funerary objects to Tuolumne Band of Me-Wuk Indians of the Tuolumne Rancheria of California may proceed.

The San Francisco State University NAGPRA Program is responsible for notifying the Tuolumne Band of Me-Wuk Indians of the Tuolumne Rancheria of California that this notice has been published.

History and Description of the Cultural Items

In 1977 and 1978, 346 cultural items were removed from the Jackson Farm site (40Wg17) in Washington County, TN, by the Forest Service archeologist Dr. Howard Earnest. Dr. Earnest removed human remains at the same time, but the human remains are not associated with these cultural items. Dr. Earnest excavated 20 burial units that were extensively disturbed through massive sheet erosion of the site from flooding of the Nolichucky River in the fall of 1977. The cultural items removed by Dr. Earnest have been curated by Western Carolina University since excavation. The 346 unassociated funerary objects are 292 whole glass beads; 3 half glass beads; 3 marine shell gorgets; 25 tubular brass beads; 1 brass gorget; 1 brass animal effigy pendant

with brass tear-shaped pendants; 1 miniature brass effigy axe; 19 mica discs; and 1 brass cone or tinkler.

Based on the location of the Jackson Farm site, it is reasonable to assume a relationship of shared group identity between these cultural items and the Cherokee people, currently represented by the Cherokee Nation, the Eastern Band of Cherokee Indians, and the United Keetoowah Band of Cherokee Indians in Oklahoma.

Determinations Made by the USDA Forest Service Cherokee National Forest

Officials of the USDA Forest Service, Cherokee National Forest have determined that:
