SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The standard protects workers from adverse health effects from occupational exposure to asbestos, including lung cancer, mesothelioma, asbestosis (an emphysema-like condition) and gastrointestinal cancer. The standard requires employers to monitor worker exposure, to provide medical surveillance, and maintain accurate records of worker exposure to asbestos. These records will be used by employers and workers and the Government to ensure that workers are not harmed by exposure to asbestos in the workplace.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the

information collection requirements, including the validity of the methodology and assumptions used;

- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

The Agency is requesting an adjustment decrease of 1,077,068 burden hours (from 4,929,794 to 3,852,726 hours) primarily due to the Agency's estimates, based on updated data, that the number of establishments and workers affected by the Standard have decreased. The operation and maintenance cost increased from \$28,816,390 to \$36,157,231 due to the estimated increase in the cost of exposure monitoring samples and medical examinations.

Type of Review: Extension of a currently approved collection.

Title: Asbestos in Construction Standard (29 CFR 1926.1101).

OMB Number: 1218-0134.

Affected Public: Business or other for-profits.

Number of Respondents: 1,044,561.

Frequency of Response: On occasion.

Total Responses: 39,251,952.

Average Time per Response: Time per response ranges from 5 minutes to maintain records to 1.67 hours to complete a medical examination.

Estimated Total Burden Hours: 3,852,726.

Estimated Cost (Operation and Maintenance): \$36,157,231.
