Abstract: The NESHAP applies to ferroalloy production facilities that manufacture ferromanganese and silicomanganese that are major sources of hazardous air pollutants (HAPs) or are co-located at major sources of HAPs. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports. Respondents that are not required to conduct an initial performance test are required to notify the EPA

Administrator of the initial compliance status of the source. Sources are also required to monitor and maintain records of its operations including: (1) Process or control device parameters; (2) bag leak detention systems; (3) maintenance plan for air pollution control devices (e.g., capture system and venturi scrubbers); (4) certification that monitoring devices are accurate; and (5) the implementation and corrective actions taken related to the startup, shutdown and malfunction plan and the fugitive dust control plan. The types of periodic reports required by this regulation include: Opacity-related reports; performance test results reports; immediate and periodic startup, shutdown, and malfunction reports; quarterly emissions reports; capture hood inspection reports; fugitive dust operations reports; and annual compliance status reports. These notifications, reports, and records are essential in determining compliance, and are required of all sources subject to NESHAP standards. This information is collected to assure compliance with 40 CFR part 63, subpart XXX.

Form Numbers: None.

Respondents/affected entities:

Ferroalloy production facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart XXX).

Estimated number of respondents: 1 (total).

Frequency of response: Initially, quarterly, semiannually, and annually.

Total estimated burden: 600 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$57,000 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a slight increase of 16 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to the rounding of estimates.

Acting Director, Collection Strategies Division.
