Agency Request for Emergency Processing of Collection of Information by the Office of Management and Budget

AGENCY: Federal Railroad Administration (FRA), United States Department of Transportation (USDOT).
ACTION: Notice.

SUMMARY: FRA hereby gives notice that it is submitting the following Information Collection request (ICR) to the Office of Management and Budget (OMB) for emergency processing under the Paperwork Reduction Act of 1995. FRA requests that OMB authorize the collection of information identified below immediately upon publication of this Notice for a period of 180 days.

SUPPLEMENTARY INFORMATION: Recent derailments have occurred involving trains transporting large quantities of petroleum crude oil and ethanol. Preliminary investigation of one of these recent derailments involving a crude oil train indicates that a mechanical defect involving a broken tank car wheel may have caused or contributed to the incident. FRA is issuing Safety Advisory 2015-01 to make recommendations to enhance the mechanical safety of the cars in trains transporting large quantities of flammable liquids. The Safety Advisory recommends that railroads use highly qualified individuals to conduct the brake and mechanical inspections and recommends a reduction to the impact threshold levels the industry currently uses for wayside detectors that measure wheel impacts to ensure the wheel integrity of tank cars in those trains.

Title: Mechanical Inspections and Wheel Impact Detector Standards for Trains Transporting Large Amounts of Class 3 Flammable Liquids.

SUPPLEMENTARY INFORMATION: FRA is issuing Emergency Order No. 30 (EO or Order) to require that trains transporting large amounts of Class 3 flammable liquid through certain highly populated areas adhere to a maximum authorized operating speed limit. FRA has determined that public safety compels issuance of the Order. The Order is necessary due to the recent occurrence of railroad accidents involving trains transporting petroleum crude oil and ethanol and the increasing reliance on railroads to transport voluminous

amounts of those hazardous materials in recent years. Under the EO, an affected train is one that contains: (1) 20 or more loaded tank cars in a continuous block, or 35 or more loaded tank cars, of Class 3 flammable liquid; and (2) at least one DOT Specification 111 (DOT-111) tank car (including those built in accordance with Association of American Railroads (AAR) Casualty Prevention Circular 1232 (CPC-1232)) loaded with a Class 3 flammable liquid. Affected trains must not exceed 40 miles per hour (mph) in high-threat urban areas (HTUAs) as defined in 49 CFR 1580.3. This Order takes effect immediately.

SUPPLEMENTARY INFORMATION: Due to recent derailments involving "high hazard flammable trains" (HHFTs), FRA and PHMSA have conducted several

post-accident investigations and to ensure that stakeholders are fully aware of each agency's investigative authority and cooperate with agency personnel conducting such investigations, where time is of the essence in gathering evidence, the agencies are issuing a Safety Advisory (FRA Safety Advisory 2015-02 and Docket NO. PHMSA-2015-0118, Notice No. 15-11) to remind railroads operating HHFTs—defined as a train comprised of 20 or more loaded tank cars of a Class 3 flammable liquid in a continuous block, or a train with 35 or more loaded tank cars of a Class 3 flammable liquid across the entire train—as well as the offerors of Class 3 flammable liquids transported on such trains, of their obligation to provide PHMSA and FRA, as expeditiously as possible, with information agency personnel need to conduct investigations immediately following an accident or incident.
