

The draft guidance indicates in section III.C.10 that, to meet the conditions of the guidance, outsourcing facilities compounding animal drug from bulk drug substances for office use in veterinary practices include on the label of any compounded drug these four statements:

- “Not for resale.”
- “For use only in [fill in species and any associated condition or limitation listed in Appendix A].”
- “Compounded by [name of outsourcing facility].”
- “Adverse events associated with this compounded drug should be reported to FDA on a Form FDA 1932a.”

We tentatively conclude that these four label statements are “public disclosures of information originally supplied by the Federal Government to the recipient for the purpose of disclosure to the public” (5 CFR 1320.3(c)(2)) and are therefore not subject to review by OMB under the PRA. Thus, the time it would take to provide this information is not included in the burden estimate reported in table 2.

This draft guidance also refers to previously approved collections of information. A condition set forth in sections III.A.7., III.B.6, and III.C.5 is that any bulk drug substance used is manufactured by an establishment that is registered under section 510 of the FD&C Act (including a foreign establishment that is registered under section 360(i) of the FD&C Act) and is accompanied by a valid certificate of analysis. The information collection related to the disclosure of the certificate of analysis is approved under OMB control number 0910–0139.

Before the proposed information collection provisions contained in this draft guidance become effective, we will publish a notice in the **Federal Register** announcing OMB’s decision to approve, modify, or disapprove the proposed information collection provisions. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.
