II. Introduction

The NRC is considering an application dated March 20, 2015, by Uranerz, requesting consent for an indirect change of control with respect to its NRC Materials License SUA-1597. Under this license, Uranerz operates the Nichols Ranch ISR Project uranium milling facility located in Johnson and Campbell Counties, Wyoming. On January 4, 2015, Uranerz announced that it had executed a definitive agreement with Energy Fuels, a corporation organized under the laws of the province of Ontario, Canada and EFR Nevada Corporation, a corporation organized under the laws of the state of Nevada and an indirect wholly owned subsidiary of Energy Fuels, pursuant to which all issued and outstanding shares of Uranerz common stock would be acquired by Energy Fuels (the "transaction"). Consummation of the transaction would result in the indirect change of control of license SUA-1597 from Uranerz to Energy Fuels. Uranerz is requesting that the NRC consent to this change of control.

The application states, "Upon completion of the transaction, there will be no change in the Uranerz mine site key operation and health and safety personnel, licensed activities, or location of operations." Additionally, the application states, "there will be no changes to the personnel having operational responsibility for the Nichols Ranch project or identified in the license having responsibility for radiation safety or authorized to use licensed material." After closing of the transaction, and if the indirect change of control is approved by the NRC, Uranerz would continue to be the holder of license SUA-1597. The application asserts that Uranerz would remain technically and financially qualified as the licensee and would continue to fulfill all responsibilities as the licensee. A license amendment will not be necessary because there are no requested changes in the license.

No physical changes to the Nichols Ranch ISR project uranium milling facility or operational changes are being proposed in the application.
