Availability and Summary of Documents Proposed for Incorporation by Reference

This document proposes to amend FAA Order 7400.9Y, Airspace Designations and Reporting Points, dated August 6, 2014, and effective September 15, 2014. FAA Order 7400.9Y is publicly available as listed in the **ADDRESSES** section of this proposed rule. FAA Order 7400.9Y lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 by modifying Class E airspace extending upward from 700 feet above the surface at Converse County Airport, Douglas, WY. The airspace would be modified to within a 4-mile radius of Converse County Airport, with a segment extending from the 4-mile radius to the 7-mile radius east to southwest of the airport, and a segment extending from the 4-mile radius to 7 miles northwest of the airport. The geographic coordinates of the airport would be updated to coincide with the FAA's aeronautical database. The lateral boundary for that airspace extending from 1,200 feet above the surface would be defined utilizing latitudinal and longitudinal reference points instead of Federal airway V-19, and would not change the lateral boundaries or operating requirements of the 1,200 foot airspace. This action is necessary for the safety and management of IFR operations for SIAPs at the airport.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9Y, dated August 6, 2014, and effective September 15, 2014, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44

FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA

Order 1050.1E, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 by modifying Class E airspace extending upward from 700 feet above the surface at Tracy Municipal Airport, Tracy, CA.

Decommissioning of the Manteca VOR/DME and subsequent review of the airspace revealed that airspace redesign is necessary for the safety and management of IFR operations for standard instrument approach procedures at the airport. Class E airspace extending upward from 700 feet above the surface would be modified to within a 3.9-mile radius of Tracy Municipal Airport with segments extending from the 3.9-mile radius to 11 miles northwest, 6.4 miles east, and 9 miles southeast, of the airport.

Class E airspace designations are published in paragraph 6005, respectively, of FAA Order 7400.9Y, dated August 6, 2014, and effective September 15, 2014, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.
