Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Hazard Communication Standard information collection requirements codified in regulations 29 CFR 1910.1200, 1915.1200, 1917.28, 1918.90, 1926.59, and 1928.21. The information collection requirements in the Standard ensure the hazards of produced or imported chemicals are evaluated and information concerning these hazards is

transmitted to downstream employers and their workers. The Standard requires a chemical manufacturer or importer to evaluate chemicals it produces or imports to determine whether they are hazardous. For those chemicals determined to be hazardous, the manufacturer or importer must develop safety data sheets and warning labels. An Occupational Safety and Health Act (OSH Act) covered employer subject to the Standard is required to establish hazard communication programs to transmit information on the hazards of chemicals to its workers by means of labels on containers and safety data sheets. Implementation of these information collection requirements helps to ensure workers understand the hazards and identities of chemicals to which the workers are exposed; thereby, reducing the incidence of chemically related occupational illnesses and injuries. OSH Act sections 2(b)(9), 6, and 8(c) authorize this information collection. See 29 U.S.C. 651(b)(9), 655, and 657(c).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0072.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on June 30, 2015. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on April 27, 2015 (80 FR 23300).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section by July 30, 2015. In order to help ensure appropriate consideration, comments should mention OMB Control

Number 1218–0072. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Commercial Diving Operations Standard information collection requirements codified in regulations 29 CFR part 1910 subpart T that allow an Occupational Safety and Health Act of 1970 (OSH Act) covered employer subject to the Standard to deviate from established diving practices by tailoring diving operations to unusually hazardous diving conditions and to analyze diving records (including hospitalization and treatment records) for information in order to improve diving operations. These requirements are also a direct and efficient means for an employer to inform dive-team members about diving-related hazards, procedures to use in avoiding and controlling these hazards, and recognizing and treating

diving-related illnesses and injuries. Additionally, an employer can review equipment records to ensure that employees performed the required actions and document equipment is in safe working order. OSH Act sections 2(b)(9), (6), and 8(c) authorize this information collection. See 29 U.S.C. 651(b)(9), 655, and 657(c).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218–0069.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on June 30, 2015. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review.
