

(42 U.S.C. 7151(b), 7172(f)) and require authorization under section 202(e) of the Federal Power Act (16 U.S.C. § 824a(e)).

On January 14, 2015, DOE received an application from Del Norte for authority to transmit electric energy from the United States to Mexico as a power marketer for a five-year term using existing international transmission facilities. The Applicant is also requesting an expedited review of the Application and for DOE to issue the requested authorization no later than and effective February 28, 2015.

In its application, Del Norte states that it does not own or control any electric generation or transmission facilities, and it does not have a franchised service area. The electric energy that Del Norte proposes to export to Mexico would be surplus energy purchased from third parties such as electric utilities and Federal power marketing agencies pursuant to voluntary agreements.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC) Rules of Practice and Procedures (18 CFR 385.211). Any person desiring to become a party to these proceedings should file a motion to intervene at the above address in accordance with FERC Rule 214 (18 CFR 385.214). Five copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments on Del Norte's application to export electric energy to Mexico should be clearly marked with OE Docket No. EA-405. An additional copy is to be provided directly to Sergio Julian Carrasco Astorga, Del Norte Energy LLC, 163 Humphrey Street, New Haven, CT 06511 and to Daniel E. Frank, Sutherland Asbill & Brennan LLP, 700 Sixth Street NW., Suite 700, Washington, DC 20001.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of this application will be made available by request to the addresses provided above or by accessing the program Web site at <http://energy.gov/node/11845>.

Issued in Washington, DC, on January 27, 2015.
