#### **SUPPLEMENTARY INFORMATION:**

##### **I. Information About the Project/Document**

Water resources in the United States are affected by a number of climate stressors, including increasing temperatures, changing precipitation patterns, and extreme events. These changing conditions have implications for stormwater management as local decision makers look to improve existing infrastructure and build new stormwater systems. EPA and NOAA have conducted a number of workshops and other community efforts in cities and counties within the Chesapeake Bay and Great Lakes regions to initiate conversations about how projected land use and climate change could impact local water conditions and how adaptation (resiliency) planning can fit into decision-making processes to help meet existing goals. These conversations provided insights into the kinds of information that enable and facilitate communities' incorporation of climate change into local planning and decision making for stormwater management. The report reviews lessons learned from these adaptation planning experiences, including locally identified barriers to

addressing climate change, methods to overcome barriers in the short term, and long term information needs to further assist communities in their stormwater adaptation efforts.

### **Cross-Media Electronic Reporting: Authorized Program Revision Approval, Commonwealth of Virginia**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This notice announces EPA's approval of the Commonwealth of

Virginia's request to revise/modify its EPA Administered Permit Programs: The National Pollutant Discharge Elimination System EPA-authorized program to allow electronic reporting.

**DATES:** EPA's approval is effective October 7, 2015.

**FOR FURTHER INFORMATION CONTACT:**

Karen Seeh, U.S. Environmental Protection Agency, Office of Environmental Information, Mail Stop 2823T, 1200 Pennsylvania Avenue NW., Washington, DC 20460, (202) 566-1175, [seeh.karen@epa.gov](mailto:seeh.karen@epa.gov).

**SUPPLEMENTARY INFORMATION:** On October 13, 2005, the final Cross-Media Electronic Reporting Rule (CROMERR) was published in the **Federal Register** (70 FR 59848) and codified as part 3 of title 40 of the CFR. CROMERR establishes electronic reporting as an acceptable regulatory alternative to paper reporting and establishes requirements to assure that electronic documents are as legally dependable as their paper counterparts. Subpart D of CROMERR requires that state, tribal or local government agencies that receive, or wish to begin receiving, electronic reports under their EPA-authorized programs must apply to EPA for a revision or modification of those programs and obtain EPA approval. Subpart D provides standards for such approvals based on consideration of the electronic document receiving systems that the state, tribe, or local government will use to implement the electronic reporting. Additionally, § 3.1000(b) through (e) of 40 CFR part 3, subpart D provides special procedures for program revisions and modifications to allow electronic reporting, to be used at the option of the state, tribe or local government in place of procedures available under existing program-specific authorization regulations. An application submitted under the subpart D procedures must show that the state, tribe or local government has sufficient legal authority to implement the electronic reporting components of the programs covered by the application and will use electronic document receiving systems that meet the applicable subpart D requirements.

On January 13, 2010, the Virginia Department of Environmental Quality (VA DEQ) submitted an application titled "Electronic Environmental Data Exchange Reporting System" for revision/modification to its EPA-approved stormwater program under title 40 CFR to allow new electronic reporting. EPA reviewed VA DEQ's request to revise/modify its EPA-authorized Part 123—EPA Administered Permit Programs: The National Pollutant

Discharge Elimination System program and, based on this review, EPA determined that the application met the standards for approval of authorized program revision/modification set out in 40 CFR part 3, subpart D. In accordance with 40 CFR 3.1000(d), this notice of EPA's decision to approve Virginia's request to revise/modify its Part 123—EPA Administered Permit Programs: The National Pollutant Discharge Elimination System program to allow electronic reporting under 40 CFR part 122 is being published in the **Federal Register**.

VA DEQ was notified of EPA's determination to approve its application with respect to the authorized program listed above.

##### II. Background

EPA has granted or denied emergency exemptions to the following State and Federal agencies. The emergency exemptions may take the following form: Crisis, public health, quarantine, or specific. EPA has also listed denied emergency exemption requests in this notice.

Under FIFRA section 18 (7 U.S.C. 136p), EPA can authorize the use of a pesticide when emergency conditions exist. Authorizations (commonly called emergency exemptions) are granted to State and Federal agencies and are of four types:

1. A "specific exemption" authorizes use of a pesticide against specific pests on a limited acreage in a particular State. Most emergency exemptions are specific exemptions.

2. "Quarantine" and "public health" exemptions are emergency exemptions issued for quarantine or public health purposes. These are rarely requested.

3. A "crisis exemption" is initiated by a State or Federal agency (and is confirmed by EPA) when there is insufficient time to request and obtain EPA permission for use of a pesticide in an emergency.
