

provided in our final rule of June 25, 2007 (72 FR 34752) on the Current Good Manufacturing Practice in Manufacturing, Packaging, Labeling, or Holding Operations for Dietary Supplements, and factoring for a two percent annual growth rate), we calculate an annual disclosure burden of 3.27 disclosures (labels) per firm. Last, we expect that firms prepare the required labeling for their products in a manner that takes into account at one time all information required to be disclosed and therefore believe that less than 0.2 hours (12 minutes) per product label would be expended to fulfill this requirement.

In row 2 of Table 1 we estimate the total burden associated with the recommendation to include an explanatory statement on dietary supplement product labels letting consumers know the purpose of the domestic address or telephone number to be 1,112 hours. Based upon our knowledge of food and dietary supplement labeling, we estimate it would require less than 0.2 hours (12 minutes) per product label to include such a statement.

Associate Commissioner for Policy.

Discussion

Chapter 131 of Title 46, U.S. Code, requires the Secretary of Homeland Security to maintain a national recreational boating safety program, and gives the Secretary certain regulatory authority to implement that program. The Secretary has delegated that authority to the Coast Guard.¹ Chapter 131 mandates annual allocations of funds to State boating safety programs, and allows the Coast Guard to allocate up to 5% of the total amount of those funds to the national boating safety programs undertaken by national

nonprofit public service organizations.² These allocations are made pursuant to statutory guidelines that prescribe the purposes for which allocated funds may be used.³ The Coast Guard annually evaluates the statutory guidelines to determine how they can best be met in the coming fiscal year.

For Fiscal Year 2016, the Coast Guard has tentatively determined that it will invite national nonprofit public service organizations to apply for grant allocations in the following “areas of interest” we have identified as well as other topics.

1. Conduct Elements of a Year-Round Safe Boating Campaign. This area of interest would conduct national campaigns throughout the year that are coordinated with other safety initiatives and media events, and would—

- Align with the National Recreational Boating Safety Strategic Plan, particularly Objective 2: Boating Safety Outreach;
- Target specific boating safety topics and specific boater market segments;
- Reach boaters at the local level;
- Educate boaters about the consequences of drinking alcohol, taking drugs, or other irresponsible behavior on the water;
- Educate boaters about reporting boating accidents;
- Stress the importance of wearing life jackets;
- Educate boaters on the “New Life Jacket Standards,” as published by the Coast Guard;
- Educate boaters on propeller strike dangers and avoidance, particularly emphasizing the use of engine cut-off switch (lanyards and electronic devices);
- Stress the importance of boater safety training; and
- Emphasize that boat operators are responsible for their own safety and that of their passengers.

2. Outreach and Awareness Conference. This area of interest would use a single national conference to focus on the topics discussed under the first area of interest, in support of the National Recreational Boating Safety Strategic Plan's Objective 2—Boating Safety Outreach. Conference organizers must focus on professional development opportunities for conference participants while making every effort to ensure affordability to gain maximum attendance. The conference must provide opportunities for grant recipients, as appropriate, to present results of completed grant projects and on plans for using new Coast Guard
