DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Air Act and Clean Water Act

On December 2, 2015, the Department of Justice lodged a proposed consent decree with the United States District Court for the District of Hawaii in the lawsuit entitled *United States v. Aloha Petroleum, Ltd.*, Civil Action No. CV 15-00498 HG-BMK.

The United States' Complaint asserts claims against Aloha under Section 113(b) of the Clean Air Act ("CAA"), 42 U.S.C. 7413(b) and section 311(b) of the Clean Water Act ("CWA"), 33 U.S.C. 1321(b). Aloha operates a bulk gasoline terminal in Hilo, Hawaii (the "Terminal"). The Terminal receives petroleum products via pipelines connected to the local marine port and stores the products in large tanks prior to transfer into tank trucks at the Terminal's loading rack. The Complaint alleges that Aloha failed to install a vapor collection system, limit emissions, and conduct a performance test, as required by 40 CFR part 60, subpart XX. Under the CWA, the Complaint alleges that Aloha failed to construct a secondary containment structure that is sufficiently impervious to contain oil, or to hold oil until cleanup can occur. 40 CFR 112.7(c), 112.8(c)(2).

Under the Consent Decree, Aloha will pay a civil penalty of \$650,000, will "permanently close" the Terminal as defined in 40 CFR 112.2, and certify that it has ceased operating the loading racks

there. Aloha will also install improved containment liners at five of its other facilities.

SUPPLEMENTARY INFORMATION:

I. Background

The information collection (IC) is required by sections 203(b)(3); 212(a)(5)(A); 212(m), (n), (p), (t); and 214(c) of the Immigration and Nationality Act (INA) (8 U.S.C. 1153(b)(3); 1182(a)(5)(A); 1182(m), (n), (p), (t); and 1184(c)) and 8 CFR 214.2(h). The INA requires the Secretary of Labor to certify, among other things, that any foreign worker seeking to enter the United States (U.S.) for the purpose of performing certain skilled or unskilled labor temporarily or permanently will not, by doing so, adversely affect wages and working conditions of U.S. workers similarly employed. Before the Secretary of Labor can certify that wages for U.S. workers have not been adversely affected, he must ensure that the wages being paid the foreign workers are the same as those being offered and paid to U.S. workers.

The information contained in the Form ETA–9141 is the basis for the Secretary's determination of the wage employers must pay foreign workers to protect against an adverse effect on wages as a result of the employment of a foreign worker. Prior to submitting requests for most labor certifications or a labor condition applications to the Secretary of Labor, employers must obtain a prevailing wage for the job opportunity based on the place of employment in order to ensure that U.S. workers' wages are not being adversely affected by paying foreign workers less than the prevailing wage. Form ETA–9141, *Application for Prevailing Wage Determination*, is used to collect the

necessary information from employers to enable the Department to issue a prevailing wage for the occupation and location of the job offer. The Form ETA–9141 is used in the H–2B, H–1B, H–1B1, E–3, and PERM programs administered by the Department. The Department is not proposing any changes to the collection and is requesting a three year extension.

II. Review Focus

DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- enhance the quality, utility, and clarity of the information to be collected; and
- minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.
