Submitted comments should include detailed, supporting justification for the NRC staff to evaluate the need for changes in guidance, as well as references to the operating experience, industry standards, or other relevant reference materials that provide a sound technical basis for such changes. The NRC is also interested in comments that will improve the clarity of the documents so that the final guidance will provide a stable and acceptable evaluation standard for future subsequent license renewal applications. These guidance documents describe an acceptable, but not required, means for nuclear power plants to meet the license renewal regulations for operation during the subsequent period of extended operation. Editorial and style comments are not necessary and will not be considered, because the final versions will reflect any necessary editorial and style changes.

Dated at Rockville, Maryland, this 7th day of December 2015.

For the Nuclear Regulatory Commission.
Christopher G. Miller,
Director, Division of License Renewal, Office of Nuclear Reactor Regulation.
