

full utilization of the Pacific whiting resource.

DATES: This rule is effective December 30, 2015, until December 31, 2015. The reapportionment of Pacific whiting is applicable September 21, 2015, until December 31, 2015. Comments will be accepted through January 20, 2016.

ADDRESSES: You may submit comments, identified by NOAA–NMFS–2015–0017, by any of the following methods:

- **Electronic Submissions:** Submit all electronic public comments via the Federal eRulemaking Portal at www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2015-0017, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- **Mail:** William W. Stelle, Jr., Regional Administrator, West Coast Region, NMFS, 7600 Sand Point Way NE., Seattle, WA 98115–0070, Attn: Miako Ushio.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Miako Ushio (West Coast Region, NMFS), phone: 206–526–4644 or email: miako.ushio@noaa.gov.

SUPPLEMENTARY INFORMATION:

Electronic Access

This document is accessible via the Internet at the Office of the Federal Register’s Web site at <http://www.gpo.gov/fdsys/search/home.action>. Background information and documents are available at the Pacific Fishery Management Council’s Web site at <http://www.pcouncil.org/>.

Pacific Whiting

Pacific whiting (*Merluccius productus*) is a very productive species with highly variable recruitment (the biomass of fish that mature and enter the fishery each year) and a relatively short life span when compared to other groundfish species. Pacific whiting has the largest (by volume) annual allowable harvest levels of the more than 90

groundfish species managed under the Pacific Coast Groundfish Fishery Management Plan (FMP), which governs the groundfish fishery off Washington, Oregon, and California. The coastwide Pacific whiting stock is managed jointly by the United States (U.S.) and Canada, and mature Pacific whiting are commonly available to vessels operating in U.S. waters from April through December. Background on the stock assessment for and the establishment of the 2015 Total Allowable Catch (TAC) for Pacific whiting is provided in the final rule for the 2015 Pacific whiting harvest specifications, published May 14, 2015 (80 FR 27588). Pacific whiting is allocated to the Pacific Coast treaty tribes (tribal fishery), and to three non-tribal commercial sectors: The catcher/processor cooperative (C/P Coop), the mothership cooperative (MS Coop), and the Shorebased Individual Fishery Quota (IFQ) Program.

This document announces the reapportionment of 30,000 mt of Pacific whiting from the tribal allocation to the non-tribal commercial sectors on September 21, 2015. Regulations at § 660.131(h) contain provisions that allow the Regional Administrator to reapportion Pacific whiting from the tribal allocation, specified at § 660.50, that will not be harvested by the end of the fishing year to other sectors.

Pacific Whiting Reapportionment

For 2015, the Pacific Coast treaty tribes were allocated 56,888 mt of Pacific whiting. The best available information through September 14, 2015, indicated that there had been no harvest by the tribes to date, and at least 30,000 mt of the tribal allocation would not be harvested by December 31, 2015. To allow for full utilization of the resource, NMFS reapportioned 30,000 mt to the Shorebased IFQ Program, C/P Coop and MS Coop in proportion to each sector’s original allocation on that date. Reapportioning this amount was expected to allow for greater attainment of the TAC while not limiting tribal harvest opportunities for the remainder of the year. Emails sent directly to fishing businesses and individuals, and postings on the West Coast Region’s internet site were used to provide actual notice to the affected fishers. Reapportionment was effective the same day as the notice.

After the reapportionment, the amounts of Pacific whiting available for 2015 are:

- Tribal 26,888 mt;
- C/P Coop 100,873 mt;
- MS Coop 71,204 mt; and
- Shorebased IFQ Program 124,607.45 mt.

Classification

The Assistant Administrator for Fisheries, NOAA (AA), finds that good cause exists for this notification to be issued without affording prior notice and opportunity for public comment pursuant to 5 U.S.C. 553(b)(B) because such notification would be impracticable and contrary to the public interest. As previously noted, actual notice of the reapportionment was provided to fishers at the time of the action. Prior notice and opportunity for public comment on this reapportionment was impracticable because NMFS had insufficient time to provide prior notice and the opportunity for public comment between the time the information about the progress of the fishery needed to make this determination became available and the time at which fishery modifications had to be implemented in order to allow fishers access to the available fish during the remainder of the fishing season. For the same reasons, the AA also finds good cause to waive the 30-day delay in effectiveness for these actions, required under 5 U.S.C. 553(d)(3).

These actions are authorized by §§ 660.55 (i), 660.60(d) and 660.131(h) and are exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq* and 16 U.S.C. 7001 *et seq*.

Dated: December 30, 2015.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[Docket No. 141021887–5172–02]

RIN 0648–XE367

Fisheries of the Exclusive Economic Zone Off Alaska; Inseason Adjustment to the 2016 Bering Sea and Aleutian Islands Pollock, Atka Mackerel, and Pacific Cod Total Allowable Catch Amounts

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment; request for comments.

SUMMARY: NMFS is adjusting the 2016 total allowable catch (TAC) amounts for the Bering Sea and Aleutian Islands (BSAI) pollock, Atka mackerel, and Pacific cod fisheries. This action is necessary because NMFS has determined these TACs are incorrectly specified, and will ensure the BSAI pollock, Atka mackerel, and Pacific cod TACs are the appropriate amounts based on the best available scientific information. This action is consistent with the goals and objectives of the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), January 1, 2016, until the effective date of the final 2016 and 2017 harvest specifications for BSAI groundfish, unless otherwise modified or superseded through publication of a notification in the **Federal Register**.

Comments must be received at the following address no later than 4:30 p.m., A.l.t., January 16, 2016.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2014–0134, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2014-0134, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- *Mail:* Submit written comments to Glenn Merrill, Assistant Regional Administrator, Sustainable Fisheries Division, Alaska Region NMFS, Attn: Ellen Sebastian. Mail comments to P.O. Box 21668, Juneau, AK 99802–1668.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT:
Mary Furuness, 907–586–7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI exclusive economic zone according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The final 2015 and 2016 harvest specifications for groundfish in the BSAI (80 FR 11919, March 5, 2015) set the 2016 Bering Sea (BS) pollock TAC at 1,310,000 metric tons (mt), the 2016 BSAI Atka mackerel TAC at 54,817 mt, the 2016 BS Pacific cod TAC at 240,000 mt, and the AI Pacific cod TAC at 9,422 mt. In December 2015, the North Pacific Fishery Management Council (Council) recommended a 2016 BS pollock TAC of 1,340,000 mt, which is more than the 1,310,000 mt TAC established by the final 2015 and 2016 harvest specifications for groundfish in the BSAI. The Council also recommended a 2016 BSAI Atka mackerel TAC of 55,000 mt, which is more than the 54,817 mt TAC established by the final 2015 and 2016 harvest specifications for groundfish in the BSAI. Furthermore, the Council recommended a 2016 BS Pacific cod TAC of 238,680 mt, and an AI Pacific cod TAC of 12,839 mt, which is less than the BS Pacific cod TAC of 240,000 mt, and more than the AI Pacific cod TAC of 9,422 mt established by the final 2015 and 2016 harvest specifications for groundfish in the BSAI. The Council’s recommended 2016 TACs, and the area and seasonal apportionments, are based on the Stock Assessment and Fishery Evaluation report (SAFE), dated November 2015, which NMFS has determined is the best available scientific information for these fisheries.

Steller sea lions occur in the same location as the pollock, Atka mackerel, and Pacific cod fisheries and are listed as endangered under the Endangered Species Act (ESA). Pollock, Atka mackerel, and Pacific cod are a principal prey species for Steller sea lions in the BSAI. The seasonal apportionment of pollock, Atka mackerel, and Pacific cod harvest is necessary to ensure the groundfish fisheries are not likely to cause jeopardy of extinction or adverse modification of

critical habitat for Steller sea lions. NMFS published regulations and the revised harvest limit amounts for Atka mackerel, Pacific cod, and pollock fisheries to implement Steller sea lion protection measures to insure that groundfish fisheries of the BSAI are not likely to jeopardize the continued existence of the western distinct population segment of Steller sea lions or destroy or adversely modify their designated critical habitat (79 FR 70286, November 25, 2014). The regulations at § 679.20(a)(5)(i) specify how the BS pollock TAC will be apportioned. The regulations at § 679.20(a)(7) specify how the BSAI Pacific cod TAC will be apportioned. The regulations at § 679.20(a)(8) specify how the BSAI Atka mackerel TAC will be apportioned.

In accordance with § 679.25(a)(1)(iii), (a)(2)(i)(B), and (a)(2)(iv), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that, based on the November 2015 SAFE report for this fishery, the current BSAI pollock, Atka mackerel, and Pacific cod TACs are incorrectly specified. Pursuant to § 679.25(a)(1)(iii), the Regional Administrator is adjusting the 2016 BS pollock TAC to 1,340,000 mt, the 2016 BSAI Atka mackerel TAC to 55,000, the 2016 BS Pacific cod TAC to 238,680 mt, and the AI Pacific cod TAC to 12,839 mt. Therefore, Table 2 of the final 2015 and 2016 harvest specifications for groundfish in the BSAI (80 FR 11919, March 5, 2015) is revised consistent with this adjustment.

Pursuant to § 679.20(a)(5)(i), Table 5 of the final 2015 and 2016 harvest specifications for groundfish in the BSAI (80 FR 11919, March 5, 2015) is revised for the 2016 BS allocations of pollock TAC to the directed pollock fisheries and to the Community Development Quota (CDQ) directed fishing allowances consistent with this adjustment. The Steller sea lion protection measure final rule (79 FR 70286, November 25, 2014), sets harvest limits for pollock in the A season (January 20 to June 10) in Areas 543, 542, and 541, see § 679.20(a)(5)(iii)(B)(6). In Area 541, the 2016 A season pollock harvest limit is no more than 30 percent, or 9,668 mt, of the AI ABC of 32,227 mt. In Area 542, the 2016 A season pollock harvest limit is no more than 15 percent, or 4,834 mt, of the AI ABC of 32,227 mt. In Area 543, the 2016 A season pollock harvest limit is no more than 5 percent, or 1,611 mt, of the AI pollock ABC of 32,227 mt.

TABLE 5—FINAL 2016 ALLOCATIONS OF POLLOCK TACS TO THE DIRECTED POLLOCK FISHERIES AND TO THE CDQ DIRECTED FISHING ALLOWANCES (DFA) ¹

[Amounts are in metric tons]

Area harvest limit ⁷ 541	9,668	n/a	n/a	n/a
542	4,834	n/a	n/a	n/a
543	1,611	n/a	n/a	n/a
Bogoslof District ICA ⁸	500	n/a	n/a	n/a

¹ Pursuant to § 679.20(a)(5)(i)(A), the BS subarea pollock, after subtracting the CDQ DFA (10 percent) and the ICA (4.0 percent), is allocated as a DFA as follows: Inshore sector—50 percent, catcher/processor sector (C/P)—40 percent, and mothership sector—10 percent. In the BS subarea, 40 percent of the DFA is allocated to the A season (January 20–June 10) and 60 percent of the DFA is allocated to the B season (June 10–November 1). Pursuant to § 679.20(a)(5)(iii)(B)(2)(i) and (ii), the annual AI pollock TAC, after subtracting first for the CDQ directed fishing allowance (10 percent) and second the ICA (2,400 mt), is allocated to the Aleut Corporation for a pollock directed fishery. In the AI subarea, the A season is allocated 40 percent of the ABC and the B season is allocated the remainder of the pollock directed fishery.

² In the BS subarea, no more than 28 percent of each sector's annual DFA may be taken from the SCA before April 1.

³ Pursuant to § 679.20(a)(5)(i)(A)(4), not less than 8.5 percent of the DFA allocated to listed catcher/processes shall be available for harvest only by eligible catcher vessels delivering to listed catcher/processes.

⁴ Pursuant to § 679.20(a)(5)(i)(A)(4)(iii), the AFA unlisted catcher/processes are limited to harvesting not more than 0.5 percent of the catcher/processes sector's allocation of pollock.

⁵ Pursuant to § 679.20(a)(5)(i)(A)(6), NMFS establishes an excessive harvesting share limit equal to 17.5 percent of the sum of the non-CDQ pollock DFAs.

⁶ Pursuant to § 679.20(a)(5)(i)(A)(7), NMFS establishes an excessive processing share limit equal to 30.0 percent of the sum of the non-CDQ pollock DFAs.

⁷ Pursuant to § 679.20(a)(5)(iii)(B)(6), NMFS establishes harvest limits for pollock in the A season in Area 541 no more than 30 percent, in Area 542 no more than 15 percent, and in Area 543 no more than 5 percent of the Aleutian Islands pollock ABC.

⁸ The Bogoslof District is closed by the final harvest specifications to directed fishing for pollock. The amounts specified are for ICA only and are not apportioned by season or sector.

Note: Seasonal or sector apportionments may not total precisely due to rounding.

Pursuant to § 679.20(a)(8), Table 7 of the final 2015 and 2016 harvest specifications for groundfish in the BSAI (80 FR 11919, March 5, 2015) is

revised for the 2016 seasonal and spatial allowances, gear shares, CDQ reserve, incidental catch allowance, and Amendment 80 allocation of the BSAI

Atka mackerel TAC consistent with this adjustment.

	B	4,773	2,589	1,798
	Critical Habitat	n/a	1,553	1,079

¹ Section 679.20(a)(8)(ii) allocates the Atka mackerel TACs, after subtracting the CDQ reserves, jig gear allocation, and ICAs to the Amendment 80 and BSAI trawl limited access sectors. The allocation of the ITAC for Atka mackerel to the Amendment 80 and BSAI trawl limited access sectors is established in Table 33 to part 679 and § 679.91. The CDQ reserve is 10.7 percent of the TAC for use by CDQ participants (see §§ 679.20(b)(1)(ii)(C) and 679.31).

² Regulations at §§ 679.20(a)(8)(ii)(A) and 679.22(a) establish temporal and spatial limitations for the Atka mackerel fishery.

³ The seasonal allowances of Atka mackerel are 50 percent in the A season and 50 percent in the B season.

⁴ Section 679.23(e)(3) authorizes directed fishing for Atka mackerel with trawl gear during the A season from January 20 to June 10 and the B season from June 10 to December 31.

⁵ Section 679.20(a)(8)(ii)(C)(1)(i) limits no more than 60 percent of the annual TACs in Areas 542 and 543 to be caught inside of critical habitat; (a)(ii)(C)(1)(ii) equally divides the annual TACs between the A and B seasons as defined at § 679.23(e)(3); and (a)(8)(ii)(C)(2) requires the TAC in Area 543 shall be no more than 65 percent of ABC.

⁶ Section 679.20(a)(8)(i) requires that up to 2 percent of the Eastern Aleutian District and the Bering Sea subarea TAC be allocated to jig gear after subtracting the CDQ reserve and ICA. The amount of this allocation is 0.5 percent. The jig gear allocation is not apportioned by season.

Note: Seasonal or sector apportionments may not total precisely due to rounding.

Pursuant to § 679.20(a)(7), Table 9 of the final 2015 and 2016 harvest specifications for groundfish in the

BSAI (80 FR 11919, March 5, 2015) is revised for the 2016 gear shares and seasonal allowances of the BSAI Pacific

cod TAC consistent with this adjustment.

				Aug 31–Dec 31	629

¹ The gear shares and seasonal allowances for BSAI Pacific cod TAC are based on the sum of the BS and AI Pacific cod TACs, after the subtraction of CDQ. If the TAC for Pacific cod in either the AI or BS is reached, then directed fishing for Pacific cod in that subarea may be prohibited, even if a BSAI allowance remains.

² The ICA for the hook-and-line and pot sectors will be deducted from the aggregate portion of Pacific cod TAC allocated to the hook-and-line and pot sectors. The Regional Administrator approves an ICA of 500 mt for 2016 based on anticipated incidental catch in these fisheries.

Note: Seasonal or sector apportionments may not total precisely due to rounding.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would allow for harvests that exceed the appropriate allocations for pollock, Atka mackerel, and Pacific cod in the BSAI based on the best scientific information available. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of December 28, 2015, and additional time for prior public comment would result in conservation concerns for the ESA-listed Steller sea lions.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

Under § 679.25(c)(2), interested persons are invited to submit written

comments on this action to the above address until January 16, 2015.

This action is required by § 679.20 and § 679.25 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: December 30, 2015.

Alan D. Risenhoover,
Director, Office of Sustainable Fisheries,
National Marine Fisheries Service.

RIN 0648–XE383

Fisheries of the Exclusive Economic Zone Off Alaska; Inseason Adjustment to the 2016 Gulf of Alaska Pollock and Pacific Cod Total Allowable Catch Amounts

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment; request for comments.

SUMMARY: NMFS is adjusting the 2016 total allowable catch (TAC) amounts for

the Gulf of Alaska (GOA) pollock and Pacific cod fisheries. This action is necessary because NMFS has determined these TACs are incorrectly specified, and will ensure the GOA pollock and Pacific cod TACs are the appropriate amounts based on the best available scientific information for pollock and Pacific cod in the GOA. This action is consistent with the goals and objectives of the Fishery Management Plan for Groundfish of the Gulf of Alaska.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), January 1, 2016, until the effective date of the final 2016 and 2017 harvest specifications for GOA groundfish, unless otherwise modified or superseded through publication of a notification in the **Federal Register**.

Comments must be received at the following address no later than 4:30 p.m., A.l.t., January 20, 2016.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2013–0147, by any of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2013-0147, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- **Mail:** Address written comments to Glenn Merrill, Assistant Regional Administrator, Sustainable Fisheries
