

to any other entity that Commission staff determines may be involved, and may request additional information from any relevant parties when, in the estimation of Commission staff, such information is needed to investigate the complaint or adjudicate potential violations of Commission rules.

(c) Requests for Commission determination of technical feasibility of emergency information and video description apparatus requirements.

The requirements pertaining to apparatus designed to receive or play back video programming apply only to the extent they are “technically feasible.” Parties may raise technical infeasibility as a defense when faced with a complaint alleging a violation of the apparatus requirements or they may file a request for a ruling under section 1.41 of the Commission’s rules as to technical infeasibility before manufacturing or importing the product.

(d) Requests for Commission determination of achievability of emergency information and video description apparatus requirements.

The requirements pertaining to certain apparatus designed to receive, play back, or record video programming apply only to the extent they are achievable. Manufacturers of apparatus that use a picture screen of less than 13 inches in size and of recording devices may petition the Commission, pursuant to 47 CFR 1.41, for a full or partial exemption from the video description and emergency information requirements before manufacturing or importing the apparatus. Alternatively, manufacturers may assert that a particular apparatus is fully or partially exempt as a response to a complaint, which the Commission may dismiss upon a finding that the requirements of this section are not achievable. A petition for exemption or a response to a complaint must be supported with sufficient evidence to demonstrate that compliance with the requirements is not achievable (meaning with reasonable effort or expense), and the Commission will consider four specific factors when making such a determination.

(e) Petitions for purpose-based waivers of emergency information and video description apparatus requirements.

The Commission may waive emergency information and video description apparatus requirements for any apparatus or class of apparatus that is (a) primarily designed for activities other than receiving or playing back video programming transmitted simultaneously with sound, or (b) designed for multiple purposes, capable of receiving or playing video

programming transmitted simultaneously with sound but whose essential utility is derived from other purposes. The Commission will address any requests for a purpose-based waiver on a case-by-case basis, and waivers will be available prospectively for manufacturers seeking certainty prior to the sale of a device.

(f) Submission and review of consumer eligibility information pertaining to DIRECTV, LLC’s (DIRECTV’s) waiver for provision of aural emergency information during The Weather Channel’s programming.

The Commission granted DIRECTV a waiver with respect to the set-top box models on which it is not able to implement audio functionality for emergency information, but conditioned such relief by requiring DIRECTV to provide, upon request and at no additional cost to customers who are blind or visually impaired, a set-top box model that is capable of providing aural emergency information. DIRECTV may require customers who are blind or visually impaired to submit reasonable documentation of disability to DIRECTV as a condition to providing the box at no additional cost.
