OAR oversees and coordinates the conduct and support of all HIV/AIDS research activities across the NIH Institutes and Centers (ICs). The NIH-sponsored HIV/AIDS research program includes both extramural and intramural research, buildings and facilities, research training, program evaluation, and supports a comprehensive portfolio of research representing a broad range of basic, clinical, behavioral, social science, and translational research on HIV/AIDS and its associated coinfections and comorbidities.

OAR plans and coordinates research through the development of an annual Trans-NIH Plan for HIV-Related Research that articulates the overarching HIV/AIDS research priorities and serves as the framework for developing the trans-NIH HIV/AIDS research budget. This Plan provides information about the NIH's HIV/AIDS research priorities to the scientific community, Congress, community stakeholders, HIV-affected communities, and the broad public at large. The fiscal year 2018 Trans-NIH Plan for HIV-Related Research was recently distributed on the OAR Web site: (https://www.oar.nih.gov/strategic_plan/plan_18.asp).

New overarching priorities for HIV/AIDS research were defined in the NIH Director's Statement of August 12, 2015 (<https://grants.nih.gov/grants/guide/notice-files/NOT-OD-15-137.html>).

High Priority topics of research for support include:

- (1) Reducing the incidence of HIV/AIDS;
- (2) Developing the next generation of HIV therapies;
- (3) Identifying strategies towards a cure;
- (4) Improving the prevention and treatment of HIV-associated comorbidities, coinfections, and complications; and
- (5) Cross-cutting basic research, behavioral and social science research, health disparities, and training.
