## DEPARTMENT OF JUSTICE

### Notice of Lodging of Proposed Consent Decree Under the Clean Air Act

On April 19, 2017, the Department of Justice lodged a proposed consent decree with the United States District Court for the District of New Jersey in the lawsuit entitled *United States v. Paulsboro Refining Company LLC*, Civil Action No. 2:17-cv-02662.

In a complaint, the United States, on behalf of the U.S. Environmental Protection Agency ("EPA"), alleges that Paulsboro Refining Company LLC ("Paulsboro") violated (1) the requirement to operate three flares at its petroleum refinery in Paulsboro, New Jersey, in a manner consistent with the good-air-pollution-control-practices provisions of both the new source performance standards ("NSPS") and national emission standards for hazardous air pollutants ("NESHAP") found in Sections 111, 112 and 114 of the Clean Air Act, 42 U.S.C. 7411, 7412 and 7414, and regulations promulgated thereunder; and (2) the refinery's CAA Title V Operating Permit. The proposed consent decree requires the Paulsboro to, among other things, bring the flares at the Facility into compliance with the NESHAP for Petroleum Refineries, 40 CFR part 60, subpart J. Two of the flares will be brought into compliance six

months earlier than required by that provision. Paulsboro also will pay a civil penalty of \$180,000.

The publication of this notice opens a period for public comment on the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States v. Paulsboro Refining Company LLC*, D.J. Ref. No. 90-5-2-1-10408. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

**Authority:** 44 U.S.C. 3507(a)(1)(D).

**SUPPLEMENTARY INFORMATION:** This ICR seeks to extend PRA authority for the Presence Sensing Device (PSD) Initiation Standard information collection requirements codified in regulations 29 CFR 1910.217(h). The Standard relates to a PSD in a mechanical power-press safety system. A PSD automatically stops the stroke of a mechanical power press when the device detects an operator entering a danger zone near the press. The PSD initiation standard contains a number of information collection requirements including: certifying brake monitor adjustments, alternatives to photoelectric PSDs, safety system design and installation, and worker training; annual recertification of safety systems;

establishing and maintaining the original certification and validation records and the most recent recertification and revalidation records; affixing labels to test rods and to certified and recertified presses; and notifying an OSHA-recognized third-party validation organization when a safety system component fails, the employer modifies the safety system, or a point-of-operation injury occurs. Occupational Safety and Health Act sections 6(b)(7) and 8(c) authorize this information collection. See 29 U.S.C. 655(b)(7), 29 U.S.C. 657(c).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218-0143.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on April 30, 2017. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on December 22, 2016 (81 FR 93962).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218-0143. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the

proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.
