SUPPLEMENTARY INFORMATION:

Background

Section 804 of the FAA Modernization and Reform Act of 2012 (Pub. L. 112–95) requires the FAA to develop a plan for realigning and consolidating facilities in an effort to support the transition to NextGen and reduce costs where such cost reductions can be implemented without adversely affecting safety. To address Section 804 requirements, the FAA formed a collaborative workgroup of representatives from the FAA and NATCA and PASS labor unions to develop a comprehensive process to analyze different realignment and consolidation scenarios. The collaborative process takes into account the following factors and criteria when prioritizing facilities for realignment analysis: NextGen readiness; the Terminal Automation program schedule; operational and airspace factors; existing facility conditions and workforce impacts; industry stakeholder input; costs and benefits associated with each potential realignment alternative; facilities and engineering planning and priorities; and employee career development.

The collaborative workgroup developed the guiding principles and criteria for evaluating existing Terminal Radar Approach Control (TRACON) operations. The principles support the goals of developing operationally viable realignment and consolidation scenarios, capturing recommendations, and outlining next steps. The workgroup has developed a repeatable and defensible four-step process to evaluate facility TRACON operations and prioritize for analysis; determine an initial set of realignment scenarios and a set of alternatives for each scenario; collect facility and operational data and
