The BLM signed the Record of Decision on November 16, 2012. The Eureka Moly, LLC (EML) Mount Hope Project is a new open pit and milling operation for the recovery of molybdenum, located in central Nevada. The project encompasses approximately 8,355 acres of new surface disturbance, 8,092 of which are on public lands administered by the BLM, and 263 acres on private lands controlled by EML.

On December 28, 2016, the United States Court of Appeals for the Ninth Circuit partially reversed and vacated the BLM's decision with respect to certain aspects of the agency's air quality impact and cumulative air impacts analysis. The court also remanded to the BLM to clarify the status of any public water reserves (PWRs). The SEIS will provide updated information and discussion regarding certain air quality data and analysis used in the original EIS, and will also provide clarifying language regarding PWRs potentially impacted by the project.

The BLM will consult with Native American tribes, all the stakeholders included in the original EIS, and all other interested parties.
