Background

On December 2, 2015, FSIS published the final rule to establish a mandatory inspection program for fish of the order Siluriformes and products derived from these fish (80 FR 75590). The final rule and other resources and information on Siluriformes fish can be found on the FSIS “Inspection Program For Siluriformes Fish, Including Catfish” Web page: <https://www.fsis.usda.gov/wps/portal/fsis/topics/inspection/siluriformes>.

The final rule was effective March 1, 2016; however, the Agency provided an 18-month transitional period until September 1, 2017, to give domestic

establishments time to prepare and comply with the final regulations. The transitional period also provided foreign countries with time to submit the documentation necessary to continue exporting Siluriformes fish and fish products to the United States and to show that they have equivalent inspection systems.

FSIS began inspecting domestic establishments on March 1, 2016, and began selecting imported Siluriformes fish shipments for reinspection on April 15, 2016. During the transitional period, FSIS inspection personnel have exercised broad discretion in enforcing the regulatory requirements, focusing primarily on preventing adulterated or misbranded Siluriformes fish and fish products from entering commerce.

As of August 2, 2017, to abide with direction from Congress, all shipments of imported Siluriformes fish and fish products entering the United States must be presented at an Official Import Inspection Establishment for reinspection by FSIS personnel. Specifically, the explanatory statement accompanying the Consolidated Appropriations Act, 2017, Public Law 115–31 Stat. 135, enacted May 5, 2017, directed FSIS to immediately begin reinspecting all imported Siluriformes fish and fish product shipments <https://www.congress.gov/crec/2017/05/03/CREC-2017-05-03-bk2.pdf>. FSIS announced its intention to begin this reinspection in a **Federal Register** notice on July 3, 2017 (“Import Reinspection of Fish of the Order Siluriformes” (82 FR 30721)).

FSIS held a series of domestic and import educational meetings when the final rule initially published in December 2015. In June and July 2017, FSIS held additional educational meetings in Richmond, VA, and Baltimore, MD. FSIS has gained significant insight into the domestic and importing Siluriformes fish industries during the transitional period. FSIS is announcing this educational meeting to provide collect more information and to provide updates regarding full implementation of the regulatory requirements.

In addition, the Agency is interested in exchanging information with operations that process wild-caught Siluriformes fish and fish products, and encourages representatives and parties involved in this industry to attend the

educational meetings. The Agency is particularly interested in gaining insight into how the wild-caught *Siluriformes* fish arrive at processing facilities, where the wild-caught *Siluriformes* fish are sourced, daily production volume information for these facilities, and where the final *Siluriformes* fish and fish products are being sold or distributed after processing.
