II. Background

Humans are integral to the safe operation of nuclear power plants. In the late 1970s, the NRC began to focus on ensuring adequate training of plant staff to perform their assigned tasks. The NRC studied the effects of shift work on health, and whether control room simulators would improve training, both factors affecting performance. The agency uses human factors information provided by licensees, as required by § 50.73(b)(2)(ii)(J) of title 10 of the *Code of Federal Regulations*, as a means to monitor and track human performance by highlighting concerns in the areas of training, procedures, fitness for duty, oversight, problem identification and resolution, communication, human

system interface environments, and work planning and practice. The information is used to assist in programmatic oversight of training, procedures, safety culture, human system interface, communication, and inspections. Specifically, the information is used to support the Reactor Oversight Process (ROP) by tracking and trending various levels of human performance-related causes of safety-significant events, identifying precursors, and providing either plant-specific or generic insights into ROP cross cutting areas, which include human performance, problem identification and resolution, and safety conscious work environment.

The NRC issues RISs to communicate with stakeholders on a broad range of regulatory matters. This may include communicating and clarifying the NRC’s technical or policy positions on regulatory matters that have not been communicated to, or are not broadly understood by, the nuclear industry.

III. Proposed Action

The NRC is requesting public comments on the draft RIS 2017–XX. The NRC staff will make a final determination regarding issuance of the RIS after it considers any public comments received in response to this request.

Dated at Rockville, Maryland, this 16th day of August, 2017.

For the Nuclear Regulatory Commission,
Alexander D. Garmoe,
Acting Chief, Generic Communications Branch, Division of Policy and Rulemaking, Office of Nuclear Reactor Regulation.
