BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. PF17–10–000]

National Fuel Gas Supply Corporation; Notice of Intent To Prepare an Environmental Assessment for the Planned FM100 Modernization Project and Request for Comments on Environmental Issues

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the FM100 Modernization Project involving construction and operation of facilities by National Fuel Gas Supply Corporation (National Fuel) in Cameron, Clearfield, Elk, McKean, and Potter

Counties, Pennsylvania. The Commission will use this EA in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the project. You can make a difference by providing us with your specific comments or concerns about the project. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the EA. To ensure that your comments are timely and properly recorded, please send your comments so that the Commission receives them in Washington, DC on or before December 29, 2017.

If you sent comments on this project to the Commission before the opening of this docket on September 14, 2017, you will need to file those comments in Docket No. PF17–10–000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this planned project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the planned facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the Commission approves the project, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" is available for viewing on the FERC Web site (www.ferc.gov). This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings.

Public Participation

For your convenience, there are three methods you can use to submit your

comments to the Commission. The Commission encourages electronic filing of comments and has expert staff available to assist you at (202) 502–8258 or FercOnlineSupport@ferc.gov. Please carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the *eComment* feature on the Commission's Web site (www.ferc.gov) under the link to *Documents and Filings*. This is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the *eFiling* feature on the Commission's Web site (www.ferc.gov) under the link to *Documents and Filings*. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on *eRegister*. If you are filing a comment on a particular project, please select "Comment on a Filing" as the filing type; or

(3) You can file a paper copy of your comments by mailing them to the following address. Be sure to reference the project docket number (PF17–10–000) with your submission: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

Summary of the Planned Project

National Fuel plans to abandon, construct, and operate certain pipeline and compressor facilities in order to modernize its system to meet existing delivery requirements. The FM100 Modernization Project would consist of the following facilities and actions:

- Abandonment in place of approximately 12 miles of 12-inch-diameter pipeline (Line FM120) in Cameron and Elk Counties;
- abandonment in place of approximately 44.9 miles of 12-inch-diameter pipeline (Line FM100) in Clearfield, Cameron, Elk, and Potter Counties;
- abandonment by removal of the existing Costello Compressor Station in Potter County;
- installation of 28.9 miles of new 12- or 16-inch-diameter natural gas pipeline in McKean and Potter Counties;¹
- installation of the new Marvindale Compressor Station (up to 2,000 horsepower) in McKean County;

¹ National Fuel is currently gauging interest from shippers along this section of new pipeline. If enough interest is received, National Fuel may expand the pipeline diameter from 12 to 16 inches, resulting in an increase in capacity on National Fuel's system, making the project an expansion project.
