SUPPLEMENTARY INFORMATION: The International Scientific Committee for Tuna and Tuna-like Species in the North Pacific Ocean is hosting the first Pacific bluefin tuna management strategy evaluation (MSE) workshop May 30–31, 2018, in Yokohama, Japan. MSE is a simulation that allows stakeholders (e.g., industry, managers, scientists) to assess how well different management strategies, such as harvest control rules, meet the objectives of the fishery. In accordance with the outcomes from the 2nd Joint Inter-American Tropical Tuna Commission—

Western and Central Pacific Fisheries Commission Northern Committee Working Group meeting,¹ NMFS anticipates that at this first workshop, participants will begin to develop potential management objectives that might be used in the MSE for the Pacific bluefin tuna fishery.

For the listening session, NMFS will provide stakeholders with background on the status of the Pacific bluefin tuna stock and the MSE process. Additionally, NMFS is interested in learning from stakeholders about preferred management objectives. The manner of public comment will be at the discretion of the presenters and NMFS staff.

Pacific Bluefin Tuna MSE Listening Session Topics

The Pacific bluefin tuna MSE topics will include, but are not limited to, the following:

- (1) An overview of MSE and
- (2) Example management objectives for Pacific bluefin tuna.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection.

NOAA's National Weather Service is extending its "StormReady, TsunamiReady, StormReady/StormReady Supporter Application Forms". StormReady and TsunamiReady are voluntary programs offered as a means of providing guidance and incentive to officials interested in improving their respective hazardous weather operations. The StormReady Application Form, Tsunami-Ready Application Form and StormReady/StormReady Application Form will be used by localities to apply for initial StormReady or TsunamiReady and StormReady recognition and renewal of that recognition every six years. The government will use the information collected to determine whether a community has met all of the criteria to receive StormReady and/or TsunamiReady recognition. Businesses, schools, non profit organizations and other non-governmental entities often establish severe weather safety plans and actively promote severe weather safety awareness activities. Many of these entities do not have the resources necessary to fulfill all the eligibility requirements to achieve the full StormReady, StormReady/TsunamiReady or StormReady/TsunamiReady recognition. Therefore, the NWS established the StormReady and TsunamiReady Supporter programs to recognize entities that promote the principles and guidelines of the full programs, but do not meet the eligibility requirements for full recognition.

II. Method of Collection

Applications may be faxed, mailed or emailed.
