SUPPLEMENTARY INFORMATION:

I. Background

Regulatory Guide 6.6 was published in June 1974 to provide guidance on meeting the requirements in § 32.110 of title 10 of the *Code of Federal Regulations* (10 CFR). The RG 6.6 describes a prescriptive methodology for determining whether a product should be accepted or rejected based on statistical sampling methods. The NRC is withdrawing RG 6.6 because in 2012, the regulations in part 32 of 10 CFR were amended to remove § 32.110 of 10 CFR (77 FR 43673; July 25, 2012). The amendment occurred because the Commission determined that the requirements for manufacturers or initial distributors of exempt and generally licensed products were in some cases overly prescriptive, particularly in the areas of prototype testing and acceptance sampling/quality control procedures. The new rule was intended to focus the regulations on performance rather than procedures. Therefore, the guidance contained in RG 6.6 became obsolete and RG 6.6 needs to be withdrawn.

II. General Considerations

The NRC is withdrawing RG 6.6 because it is no longer needed. Withdrawal of an RG means that the guide no longer provides useful information or has been superseded by other guidance, technological innovations, Congressional actions, or

other events. The withdrawal of RG 6.6 does not alter any prior or existing NRC licensing approval or the acceptability of licensee commitments to RG 6.6. Although RG 6.6 is withdrawn, current licensees may continue to use it, and withdrawal does not affect any existing licenses or agreements. However, RG 6.6 should not be used in future requests or applications for NRC licensing actions.
