The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at <http://www.regulations.gov> as well as enters the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC’s “Regulatory Guide” series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the NRC’s regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses.

The DG, entitled, “Qualification and Training of Personnel for Nuclear Power Plants,” is a proposed revision temporarily identified by its task number, DG–1329. DG–1329 is proposed Revision 4 of RG 1.8, “Qualification and Training of Personnel for Nuclear Power Plants.” The guide proposes revised guidance that describes methods acceptable to the staff of the NRC for complying with those portions of the Commission’s regulations associated with the selection, qualifications, and training for nuclear power plant personnel.

This proposed guide, Revision 4, endorses ANSI/ANS 3.1 2014, “Selection, Qualification, and Training of Personnel for Nuclear Power Plants,” as well as updates the guidance with

additional experience gained since Revision 3 was issued in 2000.

III. Backfitting and Issue Finality

This DG describes methods acceptable to the staff of the NRC for complying with those portions of the Commission’s regulations associated with the selection, qualifications and training for nuclear power plant personnel. Issuance of this DG, if finalized, would not constitute backfitting as defined in section 50.109 of title 10 of the *Code of Federal Regulations* (10 CFR) (the Backfit Rule) and would not otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. As discussed in the “Implementation” section of this DG, the NRC has no current intention to impose this guide, if finalized, on holders of current operating licenses or combined licenses.

This DG may be applied to applications for operating licenses, combined licenses, early site permits, and certified design rules docketed by the NRC as of the date of issuance of the final regulatory guide, as well as future applications submitted after the issuance of the regulatory guide. Such action would not constitute backfitting as defined in the Backfit Rule or be otherwise inconsistent with the applicable issue finality provision in 10 CFR part 52, inasmuch as such applicants or potential applicants are not within the scope of entities protected by the Backfit Rule or the relevant issue finality provisions in part 52.

Dated at Rockville, Maryland, this 7th day of February, 2018.

For the Nuclear Regulatory Commission.

Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.
