SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new information collection.

The success of fisheries management programs depends significantly on the availability of fishery data. Currently, the states of Washington, Oregon, and California administer a trawl logbook on behalf of the Pacific Fishery Management Council (Council) and NOAA's National Marine Fisheries Service (NMFS). The log used is a standard format developed by the Council to collect information necessary to effectively manage the fishery on a coast-wide basis. The trawl logbook collects haul-level effort data including tow time, tow location, depth of catch, net type, target strategy, and estimated pounds of fish retained per tow. Each trawl log represents a single fishing trip. The state of California repealed their requirement, effective April 1, 2019, therefore, NMFS must create a federal requirement in order to not lose logbook coverage from trawl vessels in California.

This new federal requirement will duplicate the logbook structure and process that the state of California was using in order to minimize disruption or confusion for fishery participants. Under this rule, NMFS will contract with the Pacific States Marine Fisheries Commission (PSMFC) to distribute and collect the same logbook these fishermen have been using previously. These data are used regularly by NMFS, the Pacific Fishery Management Council, the West Coast Groundfish Observer Program, NMFS Office of Law Enforcement, and the Coast Guard for fisheries management and enforcement.

II. Method of Collection

Vessels using trawl gear in a state without a state requirement for the completion and submission of the logbook will be required to complete and submit a logbook on their haul-level effort to the PSMFC. This logbook will be provided to these vessels by the PSMFC along with pre-addressed stamped envelopes to return the completed logbooks every month.

Discretionary financial assistance proposals continue to be collected using *Grants.gov* but are imported into PAMS for use by the program offices. Under the existing information collection, an external interface in PAMS allows two other types of proposal submission: DOE National Laboratories are able to submit proposals for technical work authorizations directly into PAMS, while other Federal Agencies will be able to submit Proposals for interagency awards directly into PAMS. External users from all institution types are able to submit Solicitation Letters of Intent and Pre-proposals directly into PAMS. All applicants, whether they submitted through *Grants.gov* or PAMS, are able to register with PAMS to view the proposals that were submitted. They also are able to maintain a minimal amount of information in their personal profile. The existing collection automates and streamlines the submission, tracking, and correspondence portions of financial award pre-review processes.

The information collected is used by DOE to select applicants and projects for financial awards; (5) *Annual Estimated Number of Respondents:* 20,600; (6) *Annual Estimated Number of Total Responses:* 20,600; (7) *Annual Estimated Number of Burden Hours:* 30,150 (8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* \$149,000.
