

to submit monthly reports of all import and/or export transactions.

Specifically, the Form FE-746R requires the reporting of the following information by every holder of a DOE/FE import or export authorization: The name of importer/exporter; country of origin/destination; international point of entry/exit; name of supplier; volume; price; transporters; U.S. geographic market(s) served; and duration of supply contract on a monthly basis. This information is used by both EIA and FE to assess the adequacy of energy resources to meet near and longer term domestic demands, and by FE in the management of its natural gas regulatory program.

Data collected on Form FE-746R are published in *Natural Gas Imports and Exports*, *LNG Monthly Report*, and in EIA official statistics on U.S. natural gas supply and disposition. In addition, the data are used to monitor the North American natural gas trade, which, in turn, enables the Federal government to perform market and regulatory analyses; improve the capability of industry and the government to respond to any future energy-related supply problems; and keep the general public informed of international natural gas trade;

(4a) Changes to Information Collection: FE will collect heat content in Btu per cubic foot for LNG imports and exports to account for variations in the heat content of gas being imported from and exported to various countries. This change improves the quality of the import and export volume data by applying an objective standardized unit of measurement. Also, FE will use the exemptions under the Freedom of Information Act (FOIA) to protect certain information reported on Form FE-746R, including the heat content of LNG imported and exported, prices of natural gas (including LNG) imported and exported, and the specific purchaser and end-user. The data protection statement for information reported on Form FE-746R will read:

“Information reported on Form FE-746R is considered public information and may be publicly released in company identifiable form, except that the following information will be protected and not disclosed to the public to the extent that it satisfies the criteria for exemption under the Freedom of Information Act (FOIA), 5 U.S.C. 552, as amended, and the Department of Energy (DOE) regulations, 10 C.F.R. § 1004.11, implementing the FOIA:

- Price at Import or Export Point for all forms of natural gas imported and exported, including LNG;

- Name of the Specific Purchaser/End User for all forms of natural gas imports and exports, including LNG, for all modes of transportation except by pipeline; and

- Heat content for all forms of natural gas imported and exported.”

Published LNG import and export prices will no longer be reported for each individual cargo, but rather will be aggregated for all LNG cargoes by month at each point of export. This change is consistent with the publication of statistical aggregates for the prices reported for natural gas imported and exported by pipeline. Additionally, there may be some statistics that are based on data from fewer than three import or export transactions. In these cases, it may be possible for a knowledgeable person to closely estimate the information reported by a specific respondent.

Data protection methods will not be applied to the aggregate statistical data published from submissions on Form FE-746R.

(5) *Annual Estimated Number of Respondents*: 371;

(6) *Annual Estimated Number of Total Responses*: 4,452;

(7) *Annual Estimated Number of Burden Hours*: 13,356;

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden*: The cost of the burden hours is estimated to be \$988,611. EIA estimates that there are no additional costs to respondents associated with the surveys other than the costs associated with the burden hours.
