The proposed interim registration review decisions for the chemicals in the table above were posted to the docket and the public was invited to submit any comments or new information. EPA addressed the comments or information received during the 60-day comment period for the proposed interim decisions in the discussion for each pesticide listed in the table. Comments from the 60-day comment period that were received may or may not have affected the Agency's interim decision. Pursuant to 40 CFR 155.58(c), the registration review case docket for the chemicals listed in the Table will remain open until all actions required in the interim decision have been completed.

This document also announces the posting of the amended interim decisions for ethalfuralin and hexazinone. The original interim decision for ethalfuralin was published on December 15, 2017 (82 FR 59606) (FRL-9970-54) and the original interim decision for hexazinone as published on February 27, 2018 (83 FR 8472) (FRL-9973-09). Following issuance of these

decisions, the agency received information that resulted in it amending the required label modifications. These modifications are expected to allow applicators greater flexibility, while not affecting the agency's overall risk management determinations.

This document also announces the closure of the registration review case for triforine (Case 2720, Docket ID Number EPA-HQ-OPP-2015-0853) because the last U.S. registrations for this pesticide have been canceled. Background on the registration review program is provided at: <http://www.epa.gov/pesticide-reevaluation>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Refractory Products Manufacturing (40 CFR part 63, subpart SSSSS) apply to each refractory products manufacturing facility which produces refractory bricks, refractory shapes, monolithics, kiln furniture, crucibles, and other materials used as linings for boilers, kilns, and other

processing units and equipment where extreme temperature, corrosions, and abrasion would destroy other materials. These regulations apply to existing facilities and new facilities that manufacture refractory products and use organic hazardous air pollutant (HAP), chromium refractory, and clay refractory products. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP. This information is being collected to assure compliance with 40 CFR part 63, subpart SSSSS.

Form Numbers: None.

Respondents/affected entities: Refractory products manufacturing facilities.

Respondent's obligation to respond:

Estimated number of respondents: 8 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 306 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$37,800 (per year), includes \$3,040 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: The decrease in burden from the most-recently approved ICR is not due to any program changes. The decrease in burden is due to correction of a mathematical error in the prior ICR, which inadvertently double-counted the burden for respondents to read and re-familiarize themselves with the rule requirements annually. This ICR updates the burden estimate for this requirement from 4.5 hours to 0.5 hours per respondent. The overall result is a decrease in the burden hours. There was no change in the capital/startup and O&M costs.

Courtney Kerwin,

Director, Regulatory Support Division.
