of providing the requested service or services, where the most cost-effective method of providing a service is defined as the method that costs the least after consideration of the features, quality of transmission, reliability, and other factors that the health care provider deems relevant to choosing a method of providing the required health care services. The health care provider shall submit to the Administrator paper copies of the responses or bids received in response to the requested services.

(5) The confirmation from the Rural Health Care Division shall include the date after which the requester may sign a contract with its chosen telecommunications carrier(s).

[62 FR 32948, June 17, 1997, as amended at 62 FR 41304, Aug. 1, 1997; 63 FR 2131, Jan. 13, 1998; 68 FR 74502, Dec. 24, 2003; 78 FR 13983, Mar. 1, 2013]

§ 54.604 Consortia, telecommunications services, and existing contracts.

(a) *Consortia.* (1) Under the Telecommunications Program, an eligible health care provider may join a consortium with other eligible health care providers; with schools, libraries, and library consortia eligible under subpart F of this part; and with public sector (governmental) entities to order telecommunications services. With one exception, eligible health care providers participating in consortia with ineligible private sector members shall not be eligible for supported services under this subpart. A consortium may include ineligible private sector entities if such consortium is only receiving services at tariffed rates or at market rates from those providers who do not file tariffs.

(2) For consortia, universal service support under the Telecommunications Program shall apply only to the portion of eligible services used by an eligible health care provider.

(b) *Telecommunications Services.* Any telecommunications service that is the subject of a properly completed bona fide request by a rural health care provider shall be eligible for universal service support, subject to the limitations described in this paragraph. The length of a supported telecommunications service may not exceed the distance between the health care provider and the point farthest from that provider on the jurisdictional boundary of the largest city in a state as defined in § 54.625(a).

(c) *Existing contracts.* A signed contract for services eligible for Telecommunications Program support pursuant to this subpart between an eligible health care provider as defined under § 54.600 and a telecommunications carrier shall be exempt from the competitive bid requirements set forth in § 54.603(a) as follows:

(1) A contract signed on or before July 10, 1997 is exempt from the competitive bid requirement for the life of the contract.

(2) [Reserved]

(d) For rural health care providers that take service under or pursuant to a master contract, as defined in § 54.500(f), the date of execution of that master contract represents the applicable date for purposes of determining whether and to what extent the rural health care provider is exempt from the competitive bid requirements.

(e) The competitive bid system will be deemed to be operational when the Administrator is ready to accept and post FCC Form 465 from rural health care providers on a website and that website is available for use by telecommunications carriers.

[63 FR 2131, Jan. 13, 1998; 63 FR 33586, June 19, 1998, as amended at 63 FR 70572, Dec. 21, 1998; 64 FR 22810, Apr. 28, 1999; 71 FR 65750, Nov. 9, 2006; 78 FR 13983, Mar. 1, 2013]

§ 54.605 Determining the urban rate.

(a) If a rural health care provider requests support for an eligible service to be funded from the Telecommunications Program that is to be provided over a distance that is less than or equal to the ''standard urban distance,'' as defined in paragraph (c) of this section, for the state in which it is located, the ''urban rate'' for that service shall be a rate no higher than the highest tariffed or publicly-available rate charged to a commercial customer for a functionally similar service in any city with a population of 50,000 or more in that state, calculated as if it were provided between two points within the city.

(b) If a rural health care provider requests an eligible service to be provided over a distance that is greater than the ''standard urban distance,'' as defined in paragraph (c) of this section, for the state in which it is located, the urban rate for that service shall be a rate no higher than the highest tariffed or publicly-available rate charged to a commercial customer for a functionally similar service provided over the standard urban distance in any city with a population of 50,000 or more in that state, calculated as if the service were provided between two points within the city.

(c) The ''standard urban distance'' for a state is the average of the longest diameters of all cities with a population of 50,000 or more within the state.

(d) The Administrator shall calculate the ''standard urban distance'' and shall post the ''standard urban distance'' and the maximum supported distance for each state on its website.

[62 FR 32948, June 17, 1997, as amended at 63 FR 2131, Jan. 13, 1998; 63 FR 70572, Dec. 21, 1998; 68 FR 74502, Dec. 24, 2003; 78 FR 13983, Mar. 1, 2013]

§ 54.607 Determining the rural rate.

(a) The rural rate shall be the average of the rates actually being charged to commercial customers, other than health care providers, for identical or similar services provided by the telecommunications carrier providing the service in the rural area in which the health care provider is located. The rates included in this average shall be for services provided over the same distance as the eligible service. The rates averaged to calculate the rural rate must not include any rates reduced by universal service support mechanisms. The ''rural rate'' shall be used as described in this subpart to determine the credit or reimbursement due to a telecommunications carrier that provides eligible telecommunications services to eligible health care providers.

(b) If the telecommunications carrier serving the health care provider is not providing any identical or similar services in the rural area, then the rural rate shall be the average of the tariffed and other publicly available rates, not including any rates reduced by universal service programs, charged for the same or similar services in that rural area over the same distance as the eligible service by other carriers. If there are no tariffed or publicly available rates for such services in that rural area, or if the carrier reasonably determines that this method for calculating the rural rate is unfair, then the carrier shall submit for the state commission's approval, for intrastate rates, or the Commission's approval, for interstate rates, a cost-based rate for the provision of the service in the most economically efficient, reasonably available manner.

(1) The carrier must provide, to the state commission, or intrastate rates, or to the Commission, for interstate rates, a justification of the proposed rural rate, including an itemization of the costs of providing the requested service.

(2) The carrier must provide such information periodically thereafter as required, by the state commission for intrastate rates or the Commission for interstate rates. In doing so, the carrier must take into account anticipated and actual demand for telecommunications services by all customers who will use the facilities over which services are being provided to eligible health care providers.

§ 54.609 Calculating support.

(a) The amount of universal service support provided for an eligible service to be funded from the Telecommunications Program shall be the difference, if any, between the urban rate and the rural rate charged for the service, as defined herein. In addition, all reasonable charges that are incurred by taking such services, such as state and federal taxes shall be eligible for universal service support. Charges for termination liability, penalty surcharges, and other charges not included in the cost of taking such service shall not be covered by the universal service support mechanisms. Under the Telecommunications Program, rural health care providers may choose one of the following two support options.

(1) *Distance based support.* The Administrator shall consider the base rates for telecommunications services in
